

exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action. Therefore, the staff has determined that there is no reduction in the ability of the system to perform its safety function, nor significant environmental impacts, as a result of storing the additional fuel assembly configurations.

Alternative to the Proposed Action

Since there is no significant environment impact associated with the proposed action, alternatives with equal or greater environmental impact are not evaluated. The alternative to the proposed action would be to deny approval of the exemption. Denial of the exemption request will have the same environmental impact, but would result in a potential dose increase to workers involved in cask loading activities.

Agencies and Persons Consulted

On November 4, 2002, Mr. Jim Muckerheide, Nuclear Engineer, Nuclear Safety of the Massachusetts Emergency Management Agency was contacted about the proposed action and had no comments.

Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements set forth in 10 CFR part 51. Based upon the foregoing EA, the Commission finds that the proposed action of granting the exemption from 10 CFR 72.212(a)(2), 72.212(b)(2)(i)(A), and 10 CFR 72.214 and allowing YAEC to store additional specific fuel assembly configurations in the NAC-MPC storage system will not significantly impact the quality of the human environment. Accordingly, the Commission has determined that an environmental impact statement for the proposed exemption is not warranted.

The request for exemption was docketed under 10 CFR Part 72, Docket 72-31. For further details with respect to this action, see the exemption request dated October 10, 2002. The NRC maintains an Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. These documents may be accessed through the NRC's Public Electronic Reading Room on the Internet at <http://www.nrc.gov/NRC/ADAMS/index.html>. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room Reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 7th day of November, 2002.

For the Nuclear Regulatory Commission.

Stephen C. O'Connor, Sr.

Project Manager, Spent Fuel Project Office, Office of Nuclear Material Safety and Safeguards.
