

where the controlled substances was "lawfully obtained" by the traveler abroad. In harmony with international drug control treaties, many countries, including Canada and Mexico, have laws that govern the prescribing and dispensing of controlled substances. For example, as is the case in the United States, Canadian law allows pharmacies to dispense controlled substances only pursuant to a prescription issued by a practitioner licensed to prescribe controlled substances in the province in which the controlled substance is dispensed.

The traveler seeking to import into the United States controlled substances obtained abroad for personal medical use may only do so if the controlled substances were dispensed in full compliance with the laws of the country in which they were obtained. It is the duty of the individual seeking to import a controlled substance for personal medical use pursuant to 21 U.S.C. 956(a) and DEA's regulation to know and comply with the laws of the jurisdiction in which the controlled substance was dispensed. Additionally, compliance with the CSI&EA and DEA's regulation does not excuse noncompliance with other Federal laws and state laws that may regulate the importation of controlled substances.

Regulatory Certifications

Regulatory Flexibility Act

The Administrator hereby certifies that this rulemaking has been drafted in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), and by approving it certifies that this regulation will not have a significant economic impact on a substantial number of small entities. This proposed regulation affects only individual travelers and personal use quantities of controlled substances. Small businesses are subject to other DEA regulations for the importation and exportation of controlled substances, including registration, recordkeeping, reporting and security requirements. Businesses would not be using the personal use importation exemption to bring controlled substances into the United States. In fact, this rule could help small businesses as United States residents will purchase controlled substances from United States pharmacies rather than traveling outside the United States to make such purchases.

Executive Order 12866

The Administrator further certifies that this rulemaking has been drafted in accordance with the principles of Executive Order 12866, section 1(b).

This action has been determined to be a significant regulatory action. Therefore, this regulation has been reviewed by the Office of Management and Budget.

Executive Order 12988

This regulation meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988.

Executive Order 13132

This rulemaking does not preempt or modify any provision of State law; nor does it impose enforcement responsibilities on any State; nor does it diminish the power of any State to enforce its own laws. Accordingly, this rulemaking does not have federalism implications warranting the application of Executive Order 13132.

Unfunded Mandates Reform Act of 1995

This regulation will not result in the expenditure by State, local, and tribal governments in the aggregate, or by the private sector, of \$100 million or more in any one year, and would not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This rule will not result in an annual effect on the economy of \$100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of U.S.-based companies to compete with foreign-based companies in domestic and export markets.

Background and Purpose

North Star Lady Inc., doing business as Over the Edge Motorsport Marketing and the H20 Performance Marketing Group, is sponsoring a high-speed power boat race that will take place on October 3 and 4 of 2003, in the Atlantic Ocean off Fort Lauderdale Beach, Florida. The race organizers anticipate 70 participants and 50 spectator watercraft for this event. The event will take place outside of the marked channel and will not interfere with commercial shipping. Recreational vessels and fishing vessels normally operate in the waters being used for the event but will be able to safely operate around the regulated areas with minimal delay. This rule is required to provide for the safety of life on navigable waters because of the inherent danger associated with a power boat race.
