Transmittal No. 03-29

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

- 1. The JAVELIN anti-tank missile system provides a man-portable, medium anti-tank capability to infantry, scouts, and combat engineers. JAVELIN is comprised of two major tactical components; a reusable Command Launch Unit (CLU) and a missile sealed in a disposable launch tube assembly. The CLU incorporates an integrated day/night sight and provides target engagement capability in adverse weather and countermeasure environments. The CLU may also be used in the stand-alone mode for battlefield surveillance and target detection. JAVELIN's key technical feature is the use of fire-and-forget technology that allows the gunner to fire and immediately take cover. Additional special features are the top attack and/or direct fire modes (for targets under cover), integrated day/night sight, advanced tandem warhead, imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. If the software was compromised, it could result in a loss of sensitive technology, revealing the performance capabilities of the JAVELIN Missile System. Reverse engineering of the software would require a substantial effort. While the JAVELIN system is Unclassified, Secret disclosure is required in order to employ, operate, and train on the system.
- 2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
- 3. A determination has been made that Canada can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

- (vii) Sensitivity of Technology Contained in the Defense Article or Defense Services
 Proposed to be Sold: none
- (viii) Date Report Delivered to Congress: 3SEP03

^{*} as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Egypt - High Mobility Multi-purpose Wheeled Vehicles

The Government of Egypt has requested a possible sale of 100 M1114 High Mobility Multipurpose Wheeled Vehicles (HMMWV), 400 M1113 HMMWVs, 50 M997A2 HMMWV ambulances, spare engines, spare and repair parts, test and tool sets, personnel training and equipment, publications, a U.S. Government and contractor engineering and logistics personnel services, Quality Assurance Team, and other related elements of logistics support. The estimated cost is \$109 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East.

These vehicles will enhance Egypt's force modernization efforts and provide an all-terrain mode of transportation for its ground forces. Fifty of these vehicles will be configured as ambulances. Egypt, which already has the proposed items in its inventory, will have no difficulty absorbing these trucks.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be AM General of South Bend, Indiana. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of a Quality Assurance team for a three-month interval, twice annually, to prepare for operational use and insure full mission capability of the vehicles. There will be one contractor representative for a period of two years in Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
