The Nuclear Regulatory Commission (NRC) has issued a revision of a guide in its Regulatory Guide Series and its conforming Standard Review Plan Chapter. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in its review of applications for permits and licenses, and data needed by the NRC staff in its review of applications for permits and licenses.

Revision 1 of Regulatory Guide 1.178, "An Approach for Plant-Specific Risk-Informed Decisionmaking for Inservice Inspection of Piping," provides an approach for plant-specific risk-informed decisionmaking for inservice inspection of piping.

Standard Review Plan Chapter 3.9.8, "Standard Review Plan for the Review of Risk-Informed Inservice Inspection of Piping," is a chapter in NUREG-0800,

"Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants." Chapter 3.9.8 describes review procedures and acceptance guidelines for NRC staff reviews of proposed plant-specific, risk-informed changes to a licensee's inservice inspection program for piping.
