## NUCLEAR REGULATORY COMMISSION

### Draft Construction Inspection Program for Reactors Built Under 10 CFR Part 52; Reopening of Comment Period

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Draft document; reopening of the comment period.

**SUMMARY:** On May 30, 2003, the Nuclear Regulatory Commission (NRC) issued the "Draft 10 CFR Construction Inspection Program Framework Document," which set forth the basis for the construction inspection program for reactors built under 10 CFR part 52. The framework document details the proposed audits and inspections to be conducted by the NRC during the Early Site Permit (ESP) and Combined License (COL) phases. The document also discusses how the NRC staff will verify satisfactory completion of the inspections, tests, analyses, and acceptance criteria (ITAAC) and review operational programs. The original request for comments was contained in an announcement of a public workshop on issues related to the construction inspection program for reactors built under 10 CFR part 52 (68 FR 34012). The comment period expired on September 15, 2003. Comment periods for several other documents related to construction of reactors under 10 CFR part 52 were also occurring during the same time period. In order to allow all stakeholders an opportunity to provide comments on the Construction Inspection Program Framework Document, the Commission has decided to reopen the comment period until October 30, 2003. The draft document is available for public inspection in the NRC Public Document Room located at One White Flint North, 11555 Rockville Pike, Public File Area O1 F21, Rockville, Maryland, or from the Publicly Available Records (PARS)

component of NRC's Agencywide Documents Access and Management System (ADAMS) (#ADAMS ML031400849). ADAMS is accessible from the NRC Web site, <http://www.nrc.gov>, in the Public Electronic Reading Room. For more information, contact the NRC Public Document Room (PDR) reference staff at 1-800-397-4209 or 202-634-3273 or by e-mail to [pdr@nrc.gov](mailto:pdr@nrc.gov).

**DATES:** Submit comments on the Draft Construction Inspection Program Framework Document by October 30, 2003. Comments received after the due date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

**ADDRESSES:** Submit written comments on the draft guidance to: Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, Mail Stop T6-D59, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Comments may be hand-delivered to the NRC at 11545 Rockville Pike, Rockville, Maryland, between 7:45 a.m. and 4:15 p.m. on Federal workdays. Comments may be submitted electronically by the Internet to the NRC at [nrcprep@nrc.gov](mailto:nrcprep@nrc.gov). All comments received by the Commission, including those made by Federal, State, and local agencies, Indian tribes, and other interested persons, will be made available electronically at the Commission's Public Document Room in Rockville, Maryland, or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

**FOR FURTHER INFORMATION, CONTACT:** Ms. Mary Ann M. Ashley, Inspection Program Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Ms. Ashley may be reached at (301) 415-1073 or by e-mail at [mab@nrc.gov](mailto:mab@nrc.gov).

Dated at Rockville, Maryland, this 15th day of September 2003.

For the Nuclear Regulatory Commission.

**Stuart A. Richards,**

*Chief, Inspection Program Branch, Division of Inspection Program Management, Office of Nuclear Reactor Regulation.*

## NUCLEAR REGULATORY COMMISSION

### Notice of Availability of Model Application Concerning Technical Specification Improvement To Eliminate Hydrogen Recombiner Requirement, and Relax the Hydrogen and Oxygen Monitor Requirements for Light Water Reactors Using the Consolidated Line Item Improvement Process

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of availability.

**SUMMARY:** Notice is hereby given that the staff of the Nuclear Regulatory Commission (NRC) has prepared a model safety evaluation (SE), a model no significant hazards consideration (NSHC) determination, and a model application relating to the elimination of hydrogen recombiner requirements, and relaxation of the hydrogen and oxygen monitor requirements for Light Water Reactors (LWRs). The purpose of these models is to permit the NRC to efficiently process amendments that propose to remove requirements for hydrogen recombiners, and hydrogen and oxygen monitors from Technical Specifications (TS). Licensees of nuclear power reactors to which the models apply may request amendments using the model application.

**DATES:** The NRC staff issued a **Federal Register** Notice (67 FR 50374, August 2, 2002) soliciting comments on a model safety SE and a model NSHC determination for the elimination of requirements for hydrogen recombiners, and hydrogen and oxygen monitors from TS. The NRC staff hereby announces that the attached model SE and model NSHC determination (which differ only slightly from the versions previously published) may be referenced in plant-specific applications to eliminate requirements for hydrogen recombiners, and hydrogen and oxygen monitors from TS. The staff has posted a model application on the NRC web site to assist licensees in using the consolidated line item improvement process (CLIP) to apply for the proposed TS change. The NRC staff can most efficiently consider applications based upon the model application if the application is submitted within a year of this **Federal Register** Notice.

**FOR FURTHER INFORMATION CONTACT:** William Reckley, Mail Stop: O-7D1, Division of Licensing Project Management, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone 301-415-1323.
