

impacts, non-radiological impacts to land use, soils, visual resources, transportation, water resources, noise, air quality, cultural resources, threatened and endangered species could occur because Core Laboratories would continue decay-in-storage before unrestricted disposal or burial in shallow earthen pits. Additionally, the cost of storage facilities and the cost for burial at an approved disposal site are not economical considering the fact that there are no costs associated with disposals at Class II wells.

6.0 Agencies and Persons Consulted

The NRC staff has prepared this EA with input from the Alaska Oil & Gas Conservation Commission (AOGCC) and the Texas Bureau of Radiation Control (TBRC) regarding permitting of Class II disposal wells and Zero-Wash product.

Because the proposed action is entirely within existing Class II wells, the NRC has concluded that there is no potential to affect threatened or endangered species or historic resources. Therefore, consultation with the U.S. Fish & Wildlife Service and State Historic Preservation Officers is not necessary.

The NRC staff provided a draft of this EA to the following states for review and comment: Alaska (ML031540273), California (ML031540246), Colorado (ML031540327), Louisiana (ML031540301), New Mexico (ML031540339), Oklahoma (ML031540221), Texas (ML031540332), Utah (ML031540352), and Wyoming (ML031540355). This EA has been revised to reflect the States' input where appropriate.

7.0 Conclusions

The NRC staff concluded that the proposed action complies with 10 CFR part 20 and 10 CFR part 30. Pursuant to 10 CFR part 51, the NRC staff has prepared this EA in support of the proposed license amendment for approval to allow fracturing sand well returns to be injected in Class II disposal wells that have been approved under permits to accept non-hazardous oil and gas waste by State agencies. On the basis of this EA, the NRC has concluded that the environmental impacts from the proposed action would not have any significant effect on the quality of the human environment; therefore, an environmental impact statement for the proposed action is not warranted.

III. Finding of No Significant Impact

Pursuant to the National Environmental Policy Act of 1969 (NEPA) and the Commission's regulations in 10 CFR part 51, the Commission has determined that there will not be a significant effect on the quality of the environment resulting from the approval of Core Laboratories' requested amendment for an additional disposal alternative pursuant to 10 CFR 20.2002 to inject well returns containing radioactive tracer material into Class II disposal wells that have been approved to accept non-hazardous oil and gas waste by State agencies. Accordingly, the preparation of an Environmental Impact Statement is not required for the proposed amendment to Materials License No. 42-26928-01, which would add the alternative disposal method to the license. This determination is based on the foregoing EA performed in accordance with the procedures and criteria in 10 CFR part 51.

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-33944]

Notice of Finding of No Significant Impact and Availability of Environmental Assessment for License Amendment of Materials License No. 37-30247-01, White Eagle Toxicology Laboratories, Inc.

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability of environmental assessment and finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:

Kathy Dolce Modes, Nuclear Materials Safety Branch 2, Division of Nuclear Materials Safety, Region I, 475 Allendale Road, King of Prussia, Pennsylvania, 19406; telephone (610) 337-5251; fax (610) 337-5269; or by e-mail: KAD@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to

White Eagle Toxicology Laboratories, Inc. for Materials License No. 37-30247-01, to authorize release of its facility in Doylestown, Pennsylvania for unrestricted use and has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate.

II. EA Summary

The purpose of the proposed action is to allow for the release of the licensee's Doylestown, Pennsylvania facility for unrestricted use. White Eagle Toxicology Laboratories, Inc., was authorized by NRC from September 20, 1995 to use radioactive materials for research and development purposes at the site. On May 27, 2003, White Eagle Toxicology Laboratories, Inc. requested that NRC release the facility for unrestricted use. White Eagle Toxicology Laboratories, Inc. has conducted surveys of the facility and determined that the facility meets the license termination criteria in Subpart E of 10 CFR Part 20.

III. Finding of No Significant Impact

The NRC staff has evaluated White Eagle Toxicology Laboratories, Inc.'s request and the results of the surveys and has concluded that the completed action complies with 10 CFR Part 20. The staff has prepared the EA (summarized above) in support of the proposed license amendment to terminate the license and release the facility for unrestricted use. On the basis of the EA, the NRC has concluded that the environmental impacts from the proposed action are expected to be insignificant and has determined not to prepare an environmental impact statement for the proposed action.

IV. Further Information

The EA and the documents related to this proposed action, including the application for the license amendment and supporting documentation, are available for inspection at NRC's Public Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html> (ADAMS Accession Nos. ML032930181, ML031631110 and ML032260158). These documents are also available for inspection and copying for a fee at the Region I Office, 475 Allendale Road, King of Prussia, Pennsylvania, 19406.

Dated at King of Prussia, Pennsylvania this 20th day of October, 2003.

NUCLEAR REGULATORY COMMISSION

Biweekly Notice; Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law 97-415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued, from October 3,
