SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) has received, by letter dated October 23, 2003, a request from Nuclear Fuel Services, Inc. (NFS), to amend its NRC Special Nuclear Materials License SNM-124, to authorize processing operations in the Oxide Conversion Building (OCB) and the Effluent Processing Building (EPB) at the Blended Low-Enriched Uranium (BLEU) Complex. The request is the third of three license amendment requests planned to support operations associated with downblending and conversion of high-enriched uranium materials to low-enriched uranium oxides.

NFS is currently manufacturing high-enriched nuclear reactor fuel at its facility in Erwin, Tennessee. NFS is constructing a new complex at the Erwin site to manufacture low-enriched nuclear reactor fuel. NFS is requesting this amendment to authorize operations that will convert liquid uranyl nitrate solutions into solid uranium oxide powder as part of the process for downblending and conversion of high-enriched uranium materials into low-enriched uraniumoxide. After the material is converted to uranium oxide powder, it will be transferred to another facility for fabrication of reactor fuel assemblies.
