Federal Register

Vol. 68, No. 43

Wednesday, March 5, 2003

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 40 and 150

RIN 3150-AH10

Source Material Reporting Under International Agreements

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations which require licensees to report their holdings of source material (uranium and thorium) to the agency. Currently, licensees are required to file a report with the NRC whenever they receive or transfer uranium or thorium mined outside the United States (U.S). The proposed amendment would require licensees to report the receipt or transfer of source material controlled under any of the various international Agreements for Peaceful Nuclear Cooperation. This change will enable the U.S. Government to maintain the comprehensive national inventory of nuclear materials required under these agreements. This proposed rule will also allow licensees additional flexibility in submitting their annual source material inventory statements. The proposed amendment would permit licensees to submit these statements along with their material status reports for special nuclear material.

DATES: Comments on the proposed rule must be received on or before April 4, 2003.

ADDRESSES: Submit comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attn: Rulemaking and Adjudications Staff.

Deliver comments to 11555 Rockville Pike, Rockville, MD, between 7:30 a.m. and 4:15 p.m. on Federal workdays.

SUPPLEMENTARY INFORMATION: For additional information see the Direct Final Rule published in the final rules section of this **Federal Register**.

Procedural Background

Because NRC considers this action noncontroversial and routine and because it is necessary in order to support the U.S. Government's obligations in this area, the NRC is publishing this proposed rule concurrently as a direct final rule. The direct final rule will become effective on October 1, 2003. However, if the NRC receives significant adverse comments on this direct final rule by April 4, 2003, then the NRC will publish a document that withdraws this action and will subsequently address the comments received in a final rule. Absent significant modifications to the proposed revisions requiring

republication, the NRC will not initiate a second comment period on this action.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the staff to make a change (other than editorial) to the rule.

14 CFR Part 39

[Docket No. 2002-NM-142-AD]

RIN 2120-AA64

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the superseding of an existing airworthiness directive (AD), applicable to certain Boeing Model 767 series airplanes, that currently requires a one-time inspection for missing bolts on the inboard and outboard support of the inboard main flap, and follow-on inspections and corrective actions, if necessary. For certain airplanes that are subject to the existing AD, this action would add requirements for a new one-time inspection for gaps, a new one-time torque check for loose bolts, corrective

actions if necessary, and eventual replacement of existing titanium bolts with steel bolts. These actions are necessary to detect missing, loose, or cracked bolts on the supports of the inboard main flap and prevent loss of the inboard main flap, which could result in loss of control of the airplane. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by April 21, 2003.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-114, Attention: Rules Docket No. 2002-NM-142-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227-1232. Comments may also be sent via the Internet using the following address: 9-anm-nprmcmt@faa.gov. Comments sent via fax or the Internet must contain "Docket No. 2002-NM-142-AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

- For each issue, state what specific change to the proposed AD is being requested.

- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. Discussion

On October 24, 2002, the FAA issued AD 2002-22-07, amendment 39-12932 (67 FR 66043, October 30, 2002), applicable to certain Boeing Model 767 series airplanes, to require a one-time inspection for missing bolts on the inboard and outboard support of the inboard main flap, and follow-on inspections and corrective actions, if necessary. That action was prompted by an evaluation by the airplane manufacturer that revealed that the titanium bolts on the inboard main flap did not have an acceptable fatigue life or damage-tolerance rating, and a subsequent report indicating that an operator found one missing bolt and two loose bolts out of four bolts at the aft attachment locations on the outboard support of the inboard main flap. The requirements of that AD are intended to detect missing, loose, or cracked bolts on the supports of the inboard main flap and prevent loss of the inboard main flap, which could result in loss of control of the airplane.
