

the end of the proposed 20-year extended period of operation. Onsite facilities are capable of processing of the sanitary wastewater generated by D&D activities and therefore D&D activities would result in no long-term small impacts. The No-Action alternative would result in no other non-radiological long-term small impacts. The No-Action alternative would require movement of the spent nuclear fuel inventory to another NRC licensed ISFSI. These activities are similar to, but in reverse of, receipt operations and do result in an increased level of occupational exposures and exposure to the public. Shipment of the spent nuclear fuel to another NRC licensed ISFSI before the Federal repository is ready to receive the fuel would result in two separate shipping activities, the first shipment moving the spent nuclear fuel from the GEMO ISFSI to another NRC licensed ISFSI, and the second from the second NRC licensed ISFSI to the Federal repository. Two shipments would result in more radiological consequences than a single shipment. Additionally, since the constituents of the spent nuclear fuel decay over time the radiological impacts of shipment would be larger if the spent nuclear fuel were moved immediately versus movement at the end of the proposed license renewal period in the year 2022. In the long-term, the immediate decommissioning of the GEMO ISFSI would have a larger negative impact on the local economy and infrastructure than if decommissioning were to take place at the end of the proposed extended period of operation. For the reasons cited above, the No-Action alternative considered is a less practical alternative.

As discussed in the EA, the Commission has concluded that there are no significant environmental impacts associated with the proposed license renewal of the GEMO ISFSI, and other alternatives were not pursued because of additional occupational exposures, and the impracticality of other offsite storage options.

Agencies and Persons Contacted: Officials from the Illinois Emergency Management Agency and the Illinois Office of the Governor were contacted in preparing the staff's Environmental Assessment. The Illinois Emergency Management Agency, provided comments by letter dated May 14, 2004. These comments have been addressed in the Environmental Assessment.

II. Finding of No Significant Impact

The staff has reviewed the environmental impacts for the proposed license renewal of the GEMO ISFSI

relative to the requirements set forth in 10 CFR part 51, and has prepared an Environmental Assessment. Based on the Environmental Assessment, the staff concludes that there are no significant radiological or non-radiological impacts associated with the proposed action and that issuance of a renewed license for the interim storage of spent nuclear fuel at the GEMO ISFSI will have no significant impact on the quality of the human environment. Therefore, pursuant to 10 CFR 51.31 and 51.32, a finding of no significant impact is appropriate and an environmental impact statement need not be prepared for the issuance of a renewed materials license for the GEMO ISFSI.

Further details related to this proposed action are provided in the license application, dated May 5, 2000, as supplemented August 13, 2001, September 27, 2003, and August 9, 2004, and the staff's Environmental Assessment, dated November 30, 2004. However, as of October 25, 2004, the NRC initiated an additional security review of publicly available documents to ensure that potentially sensitive information is removed from the Agencywide Documents Access and Management System (ADAMS) database accessible through the NRC's Web site at: <http://www.nrc.gov/reading-rm/adams.html>. Interested members of the public should check the NRC's Web pages for updates on the availability of documents through the ADAMS system. Copies of the referenced documents are available for review and/or copying at the Commission's Public Document Room, One White Flint North Building, 11555 Rockville Pike, Rockville, Maryland, pending resumption of public access to ADAMS. SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Public Law 104-13, May 22, 1995), this notice announces that the Office of Personnel Management (OPM) has submitted to the Office of Management and Budget (OMB) a request for a revised information collection. OPM Form 1644, Child Care Tuition Assistance Program for Federal Employees, is used to verify that child care providers are licensed and/or regulated by State and/or local authorities. Therefore, agencies need to verify that child care providers to whom they make disbursements in the form of child care subsidies meet the statutory requirement.

Approximately 2000 OPM 1644 forms will be processed annually. The OPM Form 1644 takes approximately 10 minutes to complete by each provider. The annual estimated burden is 333.3 hours.
