

Technology, Institute of Museum and Library Services, 1100 Pennsylvania Ave., NW., Room 223, Washington, DC 20506. Dr. Danvers can be reached on telephone: (202) 606-2478, fax: (202) 606-0395 or by e-mail at rdanvers@imls.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The Institute of Museum and Library Services is an independent Federal grant-making agency authorized by the Museum and Library Services Act, 20 U.S.C. Section 9101 *et seq.* The IMLS provides a variety of grant programs to assist the nation's museums and libraries in improving their operations and enhancing their services to the public. Museums and libraries of all sizes and types may receive support from IMLS programs. The Museum and Library Services Act of 2003 includes a strong emphasis on supporting library services through the development of a strong library workforce by supporting activities that educate, recruit and train persons in library and information science, particularly in areas of new technology and other critical needs, including graduate fellowships, traineeships, institutes, or other programs. This solicitation is to develop plans to collect information to assist IMLS understand library and information science (LIS) workforce needs, including supply and demand, factors that affect them, existing workforce projections.

II. Current Action

The core duties of the Institute of Museum and Library Services, as stated in its strategic plan, are to promote excellence in library services and to promote access to museum and library services for a diverse public. This goal will be accomplished in part by promoting improved workforce planning including strategies for recruitment and retention of workers. IMLS is seeking assistance in developing specific plans to collect information from libraries and other information industry employers of librarians, librarians and other information professionals, and graduate schools of library and information science. Information to be collected from libraries and other employers of LIS professionals includes current and projected employment in terms of numbers of positions (filled and vacant), functional specialization, educational requirements, skill/competency requirements, salaries and benefits, demographics, annual budget/expenditures, constituency or market

size. Information to be collected from LIS professionals includes current employment, career path and career progression, professional association/union membership and demographics. Information to be collected from the graduate LIS schools includes current and projected program offerings, recruitment, enrollment, graduation, placement, alumni tracking. These information collections will be based on geographic location (State and locality), type of employing organization and functionality of the work. A great deal of information has been collected on the LIS workforce, *e.g.*, by BLS, NCES and professional societies. The information IMLS collects should build on, but not duplicate, existing or ongoing collections.

Agency: Institute of Museum and Library Services.

Title: National Study on the Future of Librarians in the Workforce.

OMB Number: n/a.

Agency Number: 3137.

Frequency: One time.

Affected Public: Librarians and other information industry organizations, librarians and other information professionals, graduate schools of library and information science.

Number of Respondents: 27,000 libraries, 1,000 information industry employers of LIS professionals, 2,500 LIS professionals, and 60 graduate schools of library and information science.

Estimated Time Per Respondent: 2 hours per library/employer; 30 minutes per professional, 3 hour per graduate school.

Total Burden Hours: 57,430.

Total Annualized Capital/Startup Costs: 0.

Total Annual Costs: 0.

FOR FURTHER INFORMATION CONTACT: Rebecca Danvers, Director of the Office of Research and Technology, Institute of Museum and Library Services, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, telephone (202) 606-2478.

Dated: December 3, 2004.

Rebecca Danvers,

Director, Office of Research and Technology.

NATIONAL SCIENCE FOUNDATION

Committee Management Renewal

The National Science Foundation (NSF) management officials having responsibility for the Business and Operations Advisory Committee (#9556)

have determined that renewing this committee for another two years is necessary and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF), by 42 U.S.C. 1861 *et seq.* This determination follows consultation with the Committee Management Secretariat, General Services Administration.

Effective date for renewal is December 10, 2004. For more information, please contact Susanne Bolton, NSF, at (703) 292-7488.

Dated: December 3, 2004.

Susanne Bolton,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 72-25]

Notice of Issuance of Materials License SNM-2512 for the Idaho Spent Fuel Facility

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Materials License.

FOR FURTHER INFORMATION CONTACT:

James R. Hall, Senior Project Manager, Spent Fuel Project Office, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: (301) 415-1336; fax number: (301) 415-8555; e-mail: jrh@nrc.gov.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC or the Commission) has issued Materials License No. SNM-2512 to the Foster Wheeler Environmental Corporation (FWENC) for the receipt, possession, storage, and transfer of spent fuel at the Idaho Spent Fuel (ISF) Facility, an independent spent fuel storage installation (ISFSI) to be located at the Idaho National Engineering and Environmental Laboratory (INEEL), located in Butte County, Idaho. This Materials License is issued under the provisions of Title 10 of the Code of Federal Regulations, Part 72 (10 CFR Part 72), and is effective as of the date of issuance. A license for an ISFSI under 10 CFR Part 72 is issued for 20 years, but the licensee may seek to renew the license prior to its expiration.

The ISF Facility is licensed to provide interim dry storage for approximately 22 metric tons of heavy metal contained in unique fuel elements and associated radioactive materials resulting from the

operation of the Peach Bottom Unit 1 high-temperature gas reactor, the Shippingport light water breeder reactor, and various Training, Research, and Isotope reactors built by General Atomics (TRIGA reactors). The ISF Facility is designed for the repackaging of specific quantities of this spent nuclear fuel, currently stored by the U.S. Department of Energy (DOE) at the INEEL, into new storage canisters, followed by its placement into an interim dry storage vault, in preparation for eventual shipment to a high-level waste geologic repository. The ISF Facility represents one element of a Settlement Agreement, dated October 17, 1995, among the DOE, the U.S. Navy, and the State of Idaho, regarding waste removal and environmental cleanup at the INEEL.

Following receipt of FWENC's application dated November 19, 2001, the NRC staff published a "Notice of Docketing, Notice of Consideration of Issuance, and Notice of Opportunity for a Hearing for a Materials License for the Idaho Spent Fuel Facility" in the **Federal Register** on June 27, 2002 (67 FR 43358). In conjunction with the issuance of this license, the staff published a final environmental impact statement (FEIS), "Environmental Impact Statement for the Proposed Idaho Spent Fuel Facility at the Idaho National Engineering and Environmental Laboratory in Butte County, Idaho," (NUREG-1773, Final Report, January 2004). A Notice of Availability of the FEIS was published in the **Federal Register** on February 27, 2004 (69 FR 9387). The staff has determined that no significant environmental impacts will be generated as a result of construction and operation of the proposed ISF Facility.

The NRC staff has completed its environmental safeguards, and safety reviews of the Idaho Spent Fuel Facility license application and safety analysis report, as amended. The NRC staff issued Materials License No. SNM-2512 and its Safety Evaluation Report (SER) for the Idaho Spent Fuel Facility on November 30, 2004.

Further details with respect to this action are provided in the application dated November 19, 2001, as amended November 8, 2002, and March 28 and November 14, 2003; the staff's FEIS dated January 2004; Materials License SNM-2512 and the staff's SER, dated November 30, 2004; and other related documents, which are normally available in the records component of NRC's Agencywide Documents Access and Management System (ADAMS). The NRC maintains ADAMS, which provides text and image files of NRC's

public documents. However, as of October 25, 2004, the NRC initiated an additional security review of publicly available documents to ensure that potentially sensitive information is removed from the ADAMS database accessible through the NRC's Web site. Interested members of the public should check the NRC's web pages for updates on the availability of documents through the ADAMS system. When public availability is restored, these documents may be accessed through the NRC's Public Electronic Reading Room on the Internet at: <http://www.nrc.gov/reading-rm/adams.html>. After resumption of public access to ADAMS, copies of the referenced documents will also be available for review at the NRC Public Document Room (PDR), located at 11555 Rockville Pike, Rockville, MD, 20852. PDR reference staff can be contacted at 1-800-397-4209, (301) 415-4737 or by e-mail to pdr@nrc.gov. The PDR reproduction contractor will copy documents for a fee.

Dated at Rockville, Maryland, this 30th day of November, 2004.

For the Nuclear Regulatory Commission.

James R. Hall,

Senior Project Manager, Licensing Section, Spent Fuel Project Office, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-483]

Union Electric Company; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Union Electric Company (the licensee) to withdraw its December 15, 2003, application for proposed amendment to Facility Operating License No. NPF-30 for the Callaway Plant, Unit No. 1, located in Callaway County, Missouri.

The proposed amendment would have revised Technical Specifications (TSs) 3.3.9, "Boron Dilution Mitigation System (BDMS)," and 3.9.2, "Unborated Water Source Isolation Valves." The proposed changes would replace the phrase "unborated water" by the word "dilution" in several places and delete references to isolation valves BGV0178 and BGV0601. A Note would also be added to TS 3.9.2 about dilution source path valves may be unisolated.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on February 3, 2004 (69 FR 5211). However, by letter dated October 29, 2004, the licensee withdrew the proposed change.

For further details with respect to this action, see the licensee's application for amendment dated December 15, 2003, and the licensee's letter dated October 29, 2004, which withdrew the application for a license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room¹ on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or (301) 415-4737 or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 1st day of December 2004.

For the Nuclear Regulatory Commission.

Jack Donohew,

Senior Project Manager, Section 2, Project Directorate IV, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.
