Background

The State Administrative Standards form was developed in 1999 in consultation with state commissions. State commissions collectively asked for clearly stated standards by which the Corporation would assess the adequacy of their administrative systems. Indicators of competency were developed for each element of the Standards. All fifty-two commissions were reviewed once using the Standards form. The Corporation took the next year and a half to assess the process, design a new risk-based approach (as suggested by our internal audit), and streamline the form by eliminating redundancies, combining similar items, and clarifying the language.

The information that is collected will help the Corporation determine the extent to which each state commission has in place the administrative systems for effective operation. The form will be used for both self- and external assessments of the state commissions. Assessment results will be used by grantees for continuous improvement and by the Corporation for guiding training and technical assistance resources, determining appropriate levels of grantee oversight, and determining eligibility for access to competitive funding.

Current Action

The Corporation seeks to reinstate and revise the previous form. When revised, the form will be reduced from eleven (11) standards containing a total of one hundred and nine (109) elements to eight (8) standards with a total of sixty (60) elements. The form will now be completed in eGrants. The form will otherwise be used in the same manner as the previous form.

Type of Review: Renewal.
