**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Paragraph 1910.217(h) regulates the use of presence sensing devices ("PSDs") used to initiate the operation of mechanical power presses; a PSD (e.g., a photoelectric field or curtain) automatically stops the stroke of a mechanical power press when the device detects an operator entering a danger zone near the press. A mechanical power press using Presence Sensing Device Initiation (PSDI) automatically starts (initiates) the stroke when the device detects no operator within the danger zone near the press. The certification/validation of safety systems for PSDI shall consider the press, controls, safeguards, operator, and environment as an integrated system which shall comply with 29 CFR 1910.217(a) through (h). Accordingly, the Standard protects employees from serious crush injuries, amputations, and death.

**II. Special Issues for Comment**

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

**III. Proposed Actions**

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Presence Sensing Device Initiation (PSDI) (29 CFR 1910.217(h)). The Agency is requesting to retain its current burden hour of 1 hour. The Agency will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB.

*Type of Review:* Extension of currently approved information collection requirement.

*Title:* Presence Sensing Device Initiation (PSDI) (29 CFR 1910.217(h)).

*OMB Number:* 1218-0143.

*Affected Public:* Business or other for-profit.

*Number of Respondents:* 0.

*Frequency:* Initially, Annually; On occasion.

*Average Time per Response:* 0.

*Estimated Total Burden Hours:* 1.

*Estimated Cost (Operation and Maintenance):* \$0.
