

the worksheet named "Income Statements." Information from the first period balance sheet is used in conjunction with the earnings and cost-spread relationships from Farmer Mac supplied data to generate the first period's income statement. The same set of accounts is maintained in this worksheet as "Loan and Cashflow Accounts" for consistency in reporting each annual period of the 10-year stress period of the test with the exception of the line item labeled "Interest reversals to carry loan losses" which incorporates the LLRT adjustment to earnings from the "Risk Measures" worksheet. Loans that defaulted do not earn interest or guarantee and commitment fees during LLRT period. The income from each interest-bearing account is calculated, as are costs of interest-bearing liabilities. In each case, these entries are the associated interest rate for that period multiplied by the account balances.

POSTAL SERVICE

39 CFR Part 111

Service Barcode Required for Priority Mail Open and Distribute Container Address Labels

AGENCY: Postal Service™.

ACTION: Final rule.

SUMMARY: In this final rule the Postal Service provides new mailing standards to require the use of a concatenated UCC/EAN Code 128 Service barcode with a unique Service Type Code "55" on all Priority Mail® Open and Distribute container address labels. A proposed rule was published in the *Federal Register* on May 24, 2007 (Volume 72, Number 100), requiring the use of a concatenated UCC/EAN Code 128 Delivery Confirmation™ service barcode. Although no comments were received in response to the proposed rule, because of the modification we decided to publish a second proposed rule. No comments were received in response to the second proposed rule published on April 21, 2008 (Volume 73, Number 77). However, we have extended the effective date from May 12, 2008, to July 1, 2008.

DATES: *Effective Date:* July 1, 2008.

FOR FURTHER INFORMATION CONTACT: Cheryl DuBois at 202-268-3146 or Garry Rodriguez at 202-268-7281.

SUPPLEMENTARY INFORMATION:

Comments

There were no comments received on the May 24, 2007, or April 21, 2008 proposed rules.

Background

Priority Mail Open and Distribute is designed to enhance the Postal Service's ability to provide mailers with expedited service to destination delivery units and other mail processing facilities. Mailers are currently provided an option to use Delivery Confirmation service to receive performance information and confirmation that their containers arrived at the destination facility, along with the date, ZIP Code™, and time their Priority Mail Open and Distribute containers are received at the destination facility.

Summary

In order to verify the arrival at the destination facility for all Priority Mail Open and Distribute containers, the Postal Service is requiring mailers to place a barcode on all Priority Mail Open and Distribute address labels. The barcode is required to be a concatenated UCC/EAN 128 Service barcode with a unique Service Type Code (STC) "55". The text, "USPS SCAN ON ARRIVAL," above the barcode is exclusive to this service and will assist in facilitating correct scan behavior.

The decision to require the use of the Service barcode instead of the Delivery Confirmation barcode will lessen any confusion as to the appropriate scans the barcode should receive and ensure the customer gets the appropriate performance information. This will provide better visibility to the customer and enable the USPS® to monitor service performance based on the product.

The requirement is in accordance with instructions for barcode specifications, electronic file format and testing, and certification process, in Publication 91, *Confirmation Services Technical Guide*. Updates to this guide were published in the April 10, 2008, *Postal Bulletin*.

Implementation

The required use of a Service barcode with Priority Mail Open and Distribute service will be effective July 1, 2008.

The Postal Service adopts the following changes to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®), which is incorporated by reference in the *Code of Federal Regulations*. See 39 CFR 111.1.

ACTION: Final rule, correction.

SUMMARY: On May 7, 2008, FEMA published in the *Federal Register* a final rule that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 73 FR 25542. The table provided here represents the flooding source, location of referenced elevation, effective and modified elevation, and communities affected for the Union County and Incorporated Areas. Specifically, it addresses flooding source "Blythe Creek."
