

strategy challenges companies to set GHG reduction goals by working with EPA through the voluntary Climate Leaders program. EPA has developed this renewal ICR to ensure that the program remains credible by obtaining continued authorization to collect information from Climate Leaders Partners to ensure that Partners are meeting their GHG goals. Companies that join Climate Leaders voluntarily agree to the following: completing and submitting a Partnership Agreement; negotiating a corporate GHG reduction goal; submitting a GHG inventory management plan; participating in an onsite review of the inventory management plan, and reporting to EPA, on an annual basis, the company's GHG emissions inventory, and progress toward their GHG reduction goal via Climate Leaders Annual GHG Inventory Summary and Goal Tracking Form. The information contained in the inventories of the companies that join Climate Leaders may be considered confidential business information and is maintained as such. EPA uses the data obtained from the companies to assess the success of the program in achieving its GHG reduction goals. Responses to the information collection are voluntary.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to equal 19,636 hours and to average 87.27 hours per year per respondent. The average number of annual burden hours on first year partners for each type of one-time response is: 9 hours to complete and submit a Partnership Agreement, 47 hours for documenting and submitting an Inventory Management Plan, 22 hours participating in an on-site verification of the Inventory Management Plan, 42 hours for negotiating and setting a GHG reduction goal, 117.25 hours for establishing a base year inventory, and 4.25 hours to submit a company profile that is posted on the Web. For all other partners who have been part of the program for longer than one year, the average number of annual burden hours is 62 hours for verifying and updating the Annual GHG Inventory Summary and Goal Tracking Form one time per year.

Partners may also submit voluntary updates of company profiles or contact information, via the Climate Leaders Web site or e-mail. These updates are estimated to take not more than 2 hours per response. All of these activities are included in the annual burden estimate.

There are no capital or start-up costs associated with this information collection. The average annual operation and maintenance cost

resulting for this collection of information is \$3 for each first time respondent. The average annual labor cost is \$8,212 per respondent. The resulting total annual cost averaged over the three year period is \$1,847,771.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Climate Leaders Partner Corporations.

Estimated Number of Respondents: 225.

Frequency of Response: Annually, on occasion, one-time.

Estimated Total Annual Hour Burden: 19,636.

Estimated Total Annual Cost: \$1,847,721, includes \$0 annualized capital/startup costs, \$105 annualized Operating and Maintenance (O&M) costs and \$1,847,616 annualized labor costs.

Changes in the Estimates: There is an increase of 7,681 hours in the total estimated burden compared with that identified in the ICR currently approved by OMB. Although the reporting requirements of the Climate Leader Partnership have been streamlined to reduce the individual burden for each reporter, the increase in overall costs are due to the continued growth in the number of companies participating in the Partnership. EPA has collaborated with partners to develop these revised reporting requirements, which are better suited for establishing and tracking progress of corporate GHG reduction goals. This change is result of a more interactive program approach between EPA and Climate Leaders partners and a larger number of partners in the program since the currently approved ICR.

Dated: May 22, 2008.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. ICRs To Be Renewed

A. For All ICRs

The Agency computed the burden for each of the recordkeeping and reporting requirements applicable to the industry for the currently approved ICRs listed in this notice. Where applicable, the Agency identified specific tasks and made assumptions, while being consistent with the concept of the PRA.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions to; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The listed ICRs address Clean Air Act information collection requirements in standards (*i.e.*, regulations) which have mandatory recordkeeping and reporting requirements. Records collected under the New Source Performance Standards (NSPS) must be retained by the owner or operator for at least two years and the records collected under the National Emission Standards for Hazardous Air Pollutants (NESHAP) must be retained by the owner or operator for at least five years. In general, the required collections consist of emissions data and other information deemed not to be private.

In the absence of such information collection requirements, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis as required by the Clean Air Act.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless the Agency displays a currently valid OMB control number. The OMB control numbers for EPA's regulations under Title 40 of the Code of Federal Regulations are published in the **Federal Register**, or on the related collection instrument or form. The display of OMB control numbers for certain EPA regulations is consolidated at 40 CFR part 9.
