BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–243; EA–08–251]

In the Matter of: Oregon State University (Oregon State University TRIGA Reactor); Order Modifying Facility Operating License No. R–106

I

Oregon State University (the licensee) is the holder of Facility Operating License No. R–106 (the license), issued by the U.S. Nuclear Regulatory Commission (NRC). The NRC plans to renew the license on September 10, 2008. The license authorizes operation of the Oregon State University TRIGA Reactor (the facility) at a power level up to 1,100 kilowatts thermal and in the pulse mode, with reactivity insertions not to exceed \$2.55, and to receive, possess, and use special nuclear material associated with facility operation. The facility is a research reactor located on the campus of Oregon State University, in the city of Corvallis, Benton County, Oregon. The mailing address is Radiation Center, Oregon State University, 100 Radiation Center, Corvallis, Oregon 97331–5903.

II

Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.64, limits the use of high-enriched uranium (HEU) fuel in domestic non-power reactors (research and test reactors) (see 51 FR 6514). The regulation, which became effective on March 27, 1986, requires that if Federal Government funding for conversion-related costs is available, each licensee of a non-power reactor authorized to use HEU fuel shall replace it with low-enriched uranium (LEU) fuel acceptable to the Commission unless the Commission has determined that the reactor has a unique purpose. The Commission's stated purpose for these requirements was to reduce, to the maximum extent possible, the use of HEU fuel in order to reduce the risk of theft and diversion of HEU fuel used in non-power reactors.
