SUPPLEMENTARY INFORMATION:**I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed

and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The information collection requirements specified in the 13 Carcinogens Standard protect employees from the adverse health effects that may result from their exposure to the 13 Carcinogens. The following is a brief description of the collection of information requirements contained in the 13 Carcinogens Standard: establishing and implementing a medical surveillance program for employees assigned to enter regulated areas, informing employees of their medical examination results and providing them with access to their medical records. Further, employers must also retain employee medical records for specified time periods and provide these records to the National Institute for Occupational Safety and Health (NIOSH) under certain circumstances.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the collection of information requirements contained in the 13 Carcinogens Standard (29 CFR 1910.1003). The Agency is requesting to reduce its current burden hour estimate associated with the Standard from 1,657 hours to 1,604 hours for a total reduction of –53 hours. The reduction is primarily the result of decreasing both the number of establishments (from 97 to 93 establishments) and the number of exposed employees (from 663 to 643). The Agency will include this summary in its request to OMB to extend the approval of these collection of information requirements.

Type of Review: Extension of a currently approved collection.

Title: 13 Carcinogens Standard (29 CFR 1910.1003).

OMB Number: 1218–0085.

Affected Public: Business or other for-profits; Federal Government; State, Local or Tribal Government.

Number of Respondents: 93.

Total Responses: 2,119.

Frequency: On occasion.

Estimated Time per Response: Time per response ranges from approximately 5 minutes (for employers to maintain records) to 2 hours (for records access and transfer).

Total Burden Hours: 1,604.

Estimated Cost (Operation and Maintenance): \$88,816.
