This system is the official repository of aviation records on individuals that are required to be maintained in connection with FAA's oversight and enforcement of compliance with safety regulations and statutes and orders issued thereunder or that are required to be made available, upon request, to other agencies, certain members of the public (e.g., Aviation Medical Examiners), or the public at large.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(a) Provide basic airmen certification and qualification information to the public upon request; examples of basic information include:

- The type of certificates and ratings held;
- The date, class, and restrictions of the latest physical airman's certificate number;
- The status of the airman's certificate (i.e., whether it is current or has been amended, modified, suspended or revoked for any reason);

- Information relating to an individual's physical status or condition used to determine statistically the validity of FAA medical standards; and
- Information relating to an individual's eligibility for medical certification, requests for exemption from medical requirements, and requests for review of certificate denials.

(b) Use contact information to inform airmen of meetings and seminars conducted by the FAA regarding aviation safety.

(c) Disclose information to the National Transportation Safety Board (NTSB) in connection with its investigation responsibilities.

(d) Provide information about airmen to Federal, State, local and tribal law enforcement agencies when engaged in an official investigation in which an airman is involved.

(e) Provide information about enforcement actions or orders issued thereunder to government agencies, the

aviation industry, and the public upon request.

(h) Make airmen records available to users of FAA's Safety Performance Analysis System (SPAS), including the Department of Defense Commercial Airlift Division's Air Carrier Analysis Support System (ACAS) for its use in identifying safety hazards and risk areas, targeting inspection efforts for certificate holders of greatest risk, and monitoring the effectiveness of targeted oversight actions.

(i) Make records of an individual's positive drug test result, alcohol test result of 0.04 or greater breath alcohol concentration, or refusal to submit to testing required under a DOT-required testing program, available to third parties, including employers and prospective employers of such individuals. Records in this system are used to identify airmen to the child support agencies nationwide in enforcing child support obligations, establishing paternities, establishing and modifying support orders and location of obligors. Records named within the section on Categories of Records will be retrieved using Connect: Direct through the Social Security Administration's secure environment.
