Needs and Uses: On November 30, 2005, the Commission released *Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities; Access to Emergency Services*, Notice of Proposed Rulemaking (VRS/IP Relay 911 NPRM), CG Docket No. 03-123, FCC 05-196, published at 71 FR 5221 (February 1,

2006), which addressed the issue of access to emergency services for Internet-based forms of Telecommunications Relay Services (TRS), namely Video Relay Service (VRS) and Internet Protocol (IP) Relay. The Commission sought to adopt means to ensure that such calls promptly reach the appropriate emergency service provider.

On May 8, 2006, the Commission released *Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities; Misuse of IP Relay Service and Video Relay Service*, Further Notice of Proposed Rulemaking (*IP Relay/VRS Misuse FNPRM*), CG Docket No. 03-123, FCC 06-58, published at 71 FR 31131 (June 1, 2006), which sought further comment on whether IP Relay and VRS providers should be required to implement user registration systems and what information users should provide, as a means of curbing illegitimate IP Relay and VRS calls.

On May 9, 2006, the Commission released *Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities*, Declaratory Ruling and Further Notice of Proposed Rulemaking (*Interoperability Declaratory Ruling and FNPRM*), CG Docket No. 03-123, FCC 06-57, published at 71 FR 30818 and 71 FR 30848 (May 31, 2006). In the *Interoperability Declaratory Ruling and FNPRM*, the Commission sought comment on the feasibility of establishing a single, open, and global database of proxy numbers for VRS users that would be available to all service providers, so that a hearing person can call a VRS user through any VRS provider, and without having first to ascertain the VRS user's current IP address.

On June 24, 2008, the Commission released *Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities; E911 Requirements for IP-Enabled Service Providers*, Report and Order and Further Notice of Proposed Rulemaking (*Report and Order*), CG Docket No. 03-123 and WC Docket No. 05-196, FCC 08-151, addressing the issues raised in these notices. The *Report and Order* provides VRS and IP Relay users with a reliable and consistent means by which others (including emergency personnel) can identify or reach them by, among other things, integrating VRS and IP Relay users into the ten-digit, NANP numbering system.

First, to complete a telephone call to an Internet-based TRS user, a provider must have some method of logically

associating the telephone number dialed by the caller to the Internet-based TRS user's device. That method, known as the TRS Numbering Directory, is a central database that maps each user's telephone number to routing information needed to find that user's device on the Internet. The *Report and Order* requires VRS and IP Relay providers to collect and maintain the routing information from their registered users and to provision that information to the TRS Numbering Directory so that this mapping can occur.

Second, because there is no reliable means for VRS and IP Relay providers, unlike wireline carriers, to automatically know the physical location of their users, the *Report and Order* requires VRS and IP Relay providers to collect and maintain the Registered Location of their registered users. And to ensure that authorities can retrieve a user's Registered Location (along with the provider's name and CA's identification number for callback purposes), the *Report and Order* requires VRS and IP Relay providers to provision that information into, or make that information available through, ALI databases across the country.

Third, to ensure that VRS and IP Relay users are aware of their providers' numbering and E911 service obligations and to inform those users of their providers' E911 capabilities, the *Report and Order* requires each VRS and IP Relay provider to post an advisory on its Web site, and in any promotional materials directed to consumers, addressing numbering and E911 services for VRS or IP Relay. Providers also must obtain and keep a record of affirmative acknowledgement from each of their registered users of having received and understood the user notification.

The new or modified information collection requirements are contained in 47 CFR 64.605(a) and (b), and 47 CFR 64.611(a), (b), (c) and (f), and subject to the PRA must be approved by the Office of Management and Budget before becoming effective.

Federal Communications Commission.
