The proposed NDA includes the municipal waters of Kennebunkport, Kennebunk, and Wells.

There are marinas, yacht clubs and public landings/piers in the proposed area with a combination of mooring fields and dock space for the recreational and commercial vessels. Maine has certified that there are five pumpout facilities within the proposed area available to the boating public. The majority of facilities are connected to the sewage system. A list of the facilities, phone numbers, locations, and

hours of operation is provided at the end of this petition.

Maine has provided documentation indicating that the total vessel population is estimated to be 537 in the proposed area. It is estimated that 195 of the total vessel population may have a Marine Sanitation Device (MSD) of some type.

The proposed area is identified as a High Value Wildlife Habitat by the U.S. fish and Wildlife Service and contains the Wells National Estuarine Research Reserve and the Rachel Carson National Wildlife Refuge. The intertidal zone

includes a diverse array of habitats from rocky shores to large amounts of wetland and salt marshes and mud flats. There are over 19,700 acres of salt marshes. The area includes 672 acres of essential habitat for the federally endangered Piping Plover and Least Tern. There are 11 beaches, three marinas, three boat launches, and four campgrounds in the proposed area. This area is a popular destination for boaters due to its natural environmental diversity and would benefit from a No Discharge Area.
