

Environmental Assessment that will address the environmental effects of mining this tract. The lands included in the delineated Federal coal lease tract ("Miller Canyon") are located in Emery County, Utah, approximately three miles south of Emery, Utah, on private lands with federally administered minerals and are described as follows:

T. 22 S., R. 6 E., SLM, Emery County, Utah  
Sec. 23, S $\frac{1}{2}$ SW $\frac{1}{4}$ ;  
Sec. 26, NW $\frac{1}{4}$ NW $\frac{1}{4}$ .

Approximately 120.00 acres.

Consolidated Coal Company submitted the application for the coal lease. The company plans to mine the coal as an extension from their existing Emery Mine, if the lease is obtained. The Miller Canyon coal tract has one minable coal bed; the I seam bed. The minable portions of the coal bed in this area are around ten feet in thickness. The tract contains more than 560,000 tons of recoverable high-volatile B bituminous coal. The I coal bed may be recoverable but further analysis will be required through the R2P2 review and approval process to make this determination. The coal quality in the I coal bed on an "as received basis" is as follows: 12,180 Btu/lb., 6.1 percent moisture, 8.4 percent ash, 38.9 percent volatile matter, 47.2 percent fixed carbon and 1.1 percent sulfur. The public is invited to the meeting to make public and/or written comments on the environmental implications of leasing the proposed tract, and also to submit comments on the Fair Market Value and the Maximum Economic Recovery of the tract.

**SUPPLEMENTARY INFORMATION:** In accordance with Federal coal management regulations 43 CFR 3422 and 3425, the public meeting is being held on the proposed sale to allow public comment on and discussion of the potential effects of mining and proposed lease. The meeting is being advertised in the Emery County Progress located in Castle Dale, Utah. 43 CFR 3422 states that, no less than 30 days prior to the publication of the notice of the sale, the Secretary shall submit public comments on the Fair Market Value appraisal and the Maximum Economic Recovery and on factors that may affect these two determinations. Proprietary data marked as confidential may be submitted to the Bureau of Land Management in response to this solicitation of public comments. Data so marked shall be treated in accordance with the laws and regulations governing confidentiality of such information. A copy of the comments submitted by the public on fair market value and maximum economic recovery, except

those portions identified as proprietary by the author and meeting exemptions stated in the Freedom of Information Act, will be available for public inspection at the Bureau of Land Management, Utah State Office, during the regular business hours (8 a.m.–4 p.m.) Monday through Friday. Comments on the Fair Market Value and Maximum Economic Recovery should be sent to the Bureau of Land Management and should address, but not necessarily be limited to, the following information.

1. The quality of the coal resource;
2. The mining methods or methods which would achieve maximum economic recovery of the coal, including specifications of seams to be mined and the most desirable timing and rate of production;
3. Whether this tract is likely to be mined as part of an existing mine and therefore should be evaluated on a realistic incremental basis, in relation to the existing mine to which it has the greatest value;
4. Whether the tract should be evaluated as part of a potential larger mining unit and reevaluated as a portion of a new potential mine (*i.e.*, a tract which does not in itself form a logical mining unit);
5. Restrictions to mining that may affect coal recovery;
6. The price that the mined coal would bring when sold;
7. Costs, including mining and reclamation, of producing the coal and the time of production;
8. The percentage rate at which anticipated income streams should be discounted, either with inflation or in the absence of inflation, in which case the anticipated rate of inflation should be given;
9. Depreciation, depletion, amortization and other tax accounting factors;
10. The value of any surface estate where held privately;
11. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area;
12. Any comparable sales data of similar coal lands; and coal quantities and the Fair Market Value of the coal developed by BLM may or may not change as a result of comments received from the public and changes in the market conditions between now and when final economic evaluations are completed.

**DATES:** The public meeting is being held on Wednesday, January 21, 2009, at the Emery City Town Hall, address 15 South Center, starting at 7 p.m.

**FOR FURTHER INFORMATION CONTACT:**

Written comments on the Fair Market Value and Maximum Economic Recovery must be received by January 16, 2009, and should be addressed to Stan Perkes, 801–539–4036, Bureau of Land Management, Utah State Office, Division of Lands and Minerals, P.O.
