

Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by December 14, 2009. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 172

[Docket No. PHMSA-2009-0238 (HM-224G)]

RIN 2137-AE49

Hazardous Materials: Chemical Oxygen Generators

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA).

ACTION: Direct final rule.

SUMMARY: This direct final rule amends the Hazardous Materials Regulations to revise the quantity limitation from 25 kg “gross” to 25 kg “net” for packages of chemical oxygen generators transported aboard cargo aircraft only. The intended effect of this rule is to provide regulatory relief by raising the quantity threshold for shipments of chemical oxygen generators transported aboard cargo aircraft only. This action is necessary to address difficulties concerning implementation and compliance with the requirements for the transportation of chemical oxygen generators in outer packagings meeting certain flame penetration resistance standards and thermal protection capabilities, as evidenced by comments received from the hazardous materials industry and other interested parties. The amendment contained in this rule is a minor substantive change, in the public interest, and unlikely to result in adverse comment.

DATES: This direct final rule is effective November 16, 2009, unless an adverse comment or notice of intent to file an adverse comment is received by November 16, 2009. PHMSA will publish in the **Federal Register** a timely document confirming the effective date of this final rule.

ADDRESSES: You may submit comments identified by the docket number PHMSA-2009-0238 by any of the following methods:

Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Fax: 1-202-493-2251.

I. Background

The National Transportation Safety Board found that one of the probable causes of the May 11, 1996 crash of ValuJet Airlines flight No. 596 was a fire in the airplane’s cargo compartment that was initiated and enhanced by the actuation of one or more chemical oxygen generators that were being improperly carried as cargo. Following that tragedy, in which 110 lives were lost, the Department of Transportation:

- Prohibited the transportation of chemical oxygen generators (including personal-use chemical oxygen generators) on board passenger-carrying aircraft and the transportation of spent chemical oxygen generators on both passenger-carrying and cargo-only aircraft, 61 FR 26418 (May 24, 1996), 61 FR 68952 (Dec. 30, 1996), 64 FR 45388 (Aug. 19, 1999);
- Issued standards governing the transportation of chemical oxygen generators on cargo-only aircraft (and by motor vehicle, rail car and vessel), including the requirement for an approval issued by the Research and Special Programs Administration
