B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice

issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the biochemical pesticide discussed in this document, compared to the general population.

II. What Action is the Agency Taking?

EPA is announcing receipt of a pesticide petition filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment/modification of regulations in 40 CFR part 180 for residues of the biopesticide chemical 2,6-DIPN in or on various food commodities. EPA has determined that the pesticide petition described in this notice contains data or information prescribed in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA can make a final determination on this petition.

Pursuant to 40 CFR 180.7(f), a summary of the petition that is the subject of this notice, prepared by the petitioner, is included in a docket EPA has created for this rulemaking. The docket for this petition is available online at <http://www.regulations.gov>. As specified in FFDCA section 408(d)(3), (21 U.S.C. 346a(d)(3)), EPA is publishing notice of the petition so that the public has an opportunity to comment on this request for the establishment/modification of regulations for residues of 2,6-DIPN in or on various food commodities. Further information on the petition may be obtained through the petition summary referenced in this unit.

EPA has received a pesticide petition PP 9F7626 from Loveland Products Inc., 7251 W. 4th Street, Greeley, CO 80634 proposing pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d) to amend 40 CFR part 180 by establishing permanent tolerances for residues of the biochemical pesticide 2,6-DIPN in or on the following food commodities: Cattle, fat at 0.8 ppm; cattle, liver at 0.3 ppm; cattle, meat at 0.1 ppm; cattle, meat byproducts at 0.1 ppm; goat, fat at 0.8 ppm; goat, liver at 0.3 ppm; goat, meat at 0.1 ppm; goat, meat byproducts at 0.1 ppm; hog, fat at 0.8 ppm; hog, liver at 0.3 ppm; hog, meat at 0.1 ppm; hog, meat byproducts at 0.1 ppm; horse, fat at 0.8 ppm; horse, liver at 0.3 ppm; horse, meat at 0.1 ppm; horse, meat byproducts at 0.1 ppm; milk at 0.1 ppm;

potato at 2.0 ppm; potato, wet peel at 6.0 ppm; sheep, fat at 0.8 ppm; sheep, liver at 0.3 ppm; sheep, meat at 0.1 ppm; and sheep, meat byproducts at 0.1 ppm. The proposed tolerance levels are based on results of studies on the magnitude of 2,6-DIPN in potatoes and processed potatoes and in livestock edible commodities. EPA issued a final rule, published in the **Federal Register** of September 1, 2006 (71 FR 52003) (FRL-8081-9), which announced that it established time-limited tolerances for residues of the biochemical pesticide 2,6-DIPN in or on the above-listed commodities, with an expiration date of August 1, 2009. Because of a then-existing data gap, all initial tolerances were time-limited. The time limitation was established to provide sufficient time for the development and review of additional data, specifically a study on the nature of 2,6-DIPN residues in potatoes and animals, an independent laboratory validation of analytical methods in animal tissues, and a multiresidue method tryout. Loveland Products Inc. submitted the study on the nature of the residues in plants and animals on July 24, 2009, and a multiresidue method tryout report on October 8, 2009.

EPA is providing a shortened comment period of 10 days on this notice of filing. EPA is expediting action on this petition because the time-limited tolerances for 2,6-DIPN have expired. EPA has determined that 2,6-DIPN is a reduced risk pesticide and, given its wide-scale use on potatoes in cold storage, that it is in the public interest to have this reduced risk pesticide available as soon as possible for use on this valuable commodity. Application of 2,6-DIPN on stored potatoes decreases the number of applications necessary for a conventional pesticide on stored potatoes, thus posing less risks and providing better efficacy. EPA has previously evaluated the toxicity of 2,6-DIPN and determined that there is a reasonable certainty that no harm will result from dietary exposure to residues of 2,6-DIPN at the requested tolerance levels. Thus, EPA does not anticipate receiving any adverse comments on the subject petition. For these reasons, EPA is expediting the processing of this petition and is confident that a shortened 10-day comment period on the petition is appropriate.
