

These standards apply to the following affected facilities: demolition and renovation of facilities; the disposal of asbestos waste; asbestos milling, manufacturing and fabricating; the use of asbestos on roadways; asbestos waste conversion facilities; and the use of asbestos insulation and sprayed-on materials. This information is being collected to assure compliance with 40 CFR part 61, subpart M.

The monitoring, recordkeeping, and reporting requirements outlined in these rules are similar to those required for other NESHAP regulations. Consistent with the NESHAP General Provisions (40 CFR part 63, subpart A), respondents are required to submit initial notifications conduct performance tests, and submit semiannual reports. They are also required to maintain records of applicability determinations; performance test results; exceedances; periods of startup, shutdown, or malfunction; monitoring records; and all other information needed to determine compliance with the applicable standard, such as records of visible emissions monitoring at potential sources of asbestos and of inspection records of air cleaning devices to ensure proper operation.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 61, subpart M, as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average two hours per response.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time

needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of asbestos milling, manufacturing, fabricating, waste disposal, and waste conversion facilities

Estimated Number of Respondents: 9,432

Frequency of Response: On occasion, initially and semiannually

Estimated Total Annual Hour Burden: 229,381

Estimated Total Annual Cost: \$18,517,636, inclusive of Labor costs. There are no capital/startup or O&M costs associated with this ICR.

Changes in the Estimates: There is no change in the labor hours or burden cost (capital startup/O&M expenses) in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. It should be noted that there is minor correction to the labor hour cost due to rounding errors in the previous ICR.

Since there are no changes in the regulatory requirements and there is no significant industry growth, the labor hours and cost figures in the previous ICR are used in this ICR and there is no change in burden to industry.

Title: Background Checks for Contractor Employees (Renewal).

ICR numbers: EPA ICR No. 2159.03, OMB Control No. 2030-0043.

ICR Status: This ICR is scheduled to expire on March 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA uses contractors to perform services throughout the nation with regard to environmental emergencies involving the release, or threatened release, of oil, radioactive materials or hazardous chemicals that may potentially affect communities and

the surrounding environment. Releases may be accidental, deliberate, or may be caused by natural disasters. Emergency responders are available 24 hours-a-day to an incident, and respond with necessary personnel and equipment to eliminate dangers to the public and environment. Contractors responding to any of these types of incidents are responsible for conducting background checks and applying Government-established suitability criteria in determining whether employees are acceptable to perform on given sites or on specific projects prior to contract employee performance. The information to be collected under the ICR for Background Checks for Contractor Employees covers citizenship or valid visa, criminal convictions, weapons offenses, felony convictions, parties prohibited from receiving federal contracts. The Contractor shall maintain records of all background checks. The collection of information is required to obtain or retain a contract with work of this nature (Title 5, CFR parts 731, 732, and 736).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.55 minutes per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities affected by this action are contractors involved with Emergency Response that have significant security concerns, as determined by the Contracting Officer on a case-by-case basis, to provide qualified personnel that meet the background check requirements developed by EPA.

Estimated Number of Respondents: 1000 per year.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 550.

Estimated Total Annual Cost: \$81,410, includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 450 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to just adjustments to the estimates.

Dated: February 9, 2009.
