Title: NSPS for Pressure Sensitive Tape and Label Surface Coating Operations (Renewal).

ICR Numbers: EPA ICR Number 0658.10, OMB Control Number 2060-0004.

ICR Status: This ICR is scheduled to expire on May 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request (ICR) renewal is being submitted for the NSPS for Pressure Sensitive Tape and Label Surface Coating Operations (40 CFR part 60, subpart RR), which were promulgated on October 18, 1983. These regulations apply to each coating line used in the manufacture of pressure sensitive tape and label materials, and on which construction or reconstruction commenced after the proposal date. Facilities that input 45 megagrams of volatile organic compounds (VOC) or less per 12 month period are not subject to the emission limit established by the subpart. The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60 subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart RR.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 25.21 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information;

search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of pressure sensitive tape and label surface coating operations.

Estimated Number of Respondents: 37.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 3,353.

Estimated Total Annual Cost: \$387,141 which includes \$315,341 in labor costs, \$7,000 in capital/startup costs, and \$64,800 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours or cost to the respondents in this ICR compared to the previous ICR because the regulations have not changed over the past three years and are not anticipated to change over the next three years. Since this ICR renewal was approved to be processed under the "Expedited Approach" option, EPA has maintained the same estimate for the number of sources currently subject to this standard as indicated in the most recently approved ICR. Therefore, the labor hours figures in the previous ICR reflect the current burden to the respondents and are reiterated in this ICR.

Dated: April 29, 2010.

Director, Collection Strategies Division.
