

existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 18.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: One for each registration application, experimental use permit, or reporting of adverse effects.

Estimated total annual burden hours: 389 hours.

Estimated total annual costs: \$26,875.00. This includes an annual cost of \$26,721 for CBI substantiations and \$154 for adverse effects reporting.

IV. Are There Changes in the Estimates From the Last Approval?

There is an increase of 86 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects an increase in the number of PIP applications during the last 2 years. EPA expects that this higher level of activity will continue. This change is an adjustment.

V. What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
