SUPPLEMENTARY INFORMATION: This document provides notice that the BLM SGFO, St. George, Utah intends to prepare RMPs for the Beaver Dam Wash and the Red Cliffs National Conservation Areas and an amendment to the SGFO RMP with an associated EIS; announces the beginning of the scoping process; and seeks public input on issues and planning criteria. On March 30, 2009, Public Law 111-11 was signed into law. Section O of this legislation designated new units of BLM's National Landscape Conservation System in Washington County, Utah, including two National Conservation Areas (NCAs)—the approximately 63,500-acre Beaver Dam Wash NCA and the approximately 45,000-acre Red Cliffs NCA. The new NCAs have as their identified purposes, the conservation, protection, and enhancement of their ecological, natural, cultural/historical, recreational, scenic, educational, wildlife and scientific values, and to protect each species located in the NCA that is listed as a threatened or endangered species. The preparation of management plans for the two NCAs is mandated by Public Law 111-11 and will be completed through this planning effort. To bring the existing SGFO RMP into compliance with the new designations and mandates from Public Law 111-11, the SGFO proposes to amend the RMP to address specific issues and public land uses. The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including

alternatives, and guide the planning process. The plan amendment will be guided by the planning criteria and will identify the issues to be resolved, explain or identify the current management situation, desired resource conditions to be maintained or achieved, and the management actions necessary to achieve those objectives. Specifically, the plan amendment will consider changes to the Off-Highway Vehicle (OHV) area designations (Open, Closed, and Limited) approved through the 1999 SGFO RMP. The plan amendment will also consider nominations for Areas of Critical Environmental Concern on public lands in Washington County "where biological conservation is a priority," pursuant to section 1979 of Public Law 111-11. Preliminary issues for the planning area have been identified by BLM personnel; Federal, state, and local agencies; and other stakeholders. The issues include: Air quality, management of Beaver Dam Wash NCA, management of Red Cliffs NCA, and priority biological conservation areas.

Preliminary planning criteria include:

1. The public planning process for these NCAs will be guided by Public Law 111-11, in addition to FLPMA and NEPA.
2. The BLM will use current scientific information, research, technologies, and results of inventory, monitoring, and coordination to determine appropriate local and regional management strategies that will enhance or restore impaired systems.
3. The Joshua Tree Instant Study Area within the Beaver Dam Wash NCA will be carried forward in all alternatives for management of the Beaver Dam Wash NCA and the area will continue to be managed under Interim Management Policy for Lands Under Wilderness Review.
4. The Joshua Tree National Natural Landmark within the Beaver Dam Wash NCA continues to be a valid designation and will be carried forward in all alternatives for management of Beaver Dam Wash NCA.
5. New Wild and Scenic River proposals will not be evaluated or analyzed in this plan amendment process. One suitable river segment under SGFO administration that was not designated into the National System of Wild and Scenic Rivers by Public Law 111-11 will continue to be managed in accordance with BLM Manual 8351 Wild and Scenic Rivers—Policy and Program Direction for Identification, Evaluation, and Management.
6. Area designations (Open, Closed, or Limited Use) for motorized recreation will be consistent with the BLM
