SUPPLEMENTARY INFORMATION:

A. Purpose

Subpart 27.4, Rights in Data and Copyrights is a regulation which concerns the rights of the Government and contractors with whom the Government contracts, regarding the use, reproduction, and disclosure of information developed under such contracts. The delineation of such rights is necessary in order to protect the contractor’s rights to not disclose proprietary data and to insure that data developed with public funds is available to the public.

The information collection burdens and recordkeeping requirements included in this regulation fall into the following four categories:

(a) A provision which is to be included in solicitations where the offeror would identify any proprietary data it would use during contract performance in order that the contracting officer might ascertain if such proprietary data should be delivered.

(b) Contract provisions which, in unusual circumstances, would be included in a contract and require a contractor to deliver proprietary data to the Government for use in evaluating work results, or is software to be used in a Government computer. These situations would arise only when the very nature of the contractor’s work is comprised of limited rights data or restricted computer software and if the

Government would need to see that data in order to determine the extent of the work.

(c) A technical data certification for major systems, which requires the contractor to certify that the data delivered under the contract is complete, accurate and compliant with the requirements of the contract. As this provision is for major systems only, and few civilian agencies have such major systems, only about 30 contracts should require this certification.

(d) The Additional Data Requirements clause, which is to be included in all contracts for experimental, developmental, research, or demonstration work (other than basic or applied research to be performed solely by a university or college where the contract amount will be \$500,000 or less). The clause requires that the contractor keep all data first produced in the performance of the contract for a period of three years from the final acceptance of all items delivered under the contract. Much of this data will be in the form of deliverables provided to the Government under the contract (final report, drawings, specifications, etc.). Some data, however, will be in the form of computations, preliminary data, records of experiments, etc., and these will be the data that will be required to be kept over and above the deliverables. The purpose of such recordkeeping requirements is to insure that the Government can fully evaluate the research in order to ascertain future activities and to insure that the research was completed and fully reported, as well as to give the public an opportunity to assess the research results and secure any additional information. All data covered by this clause is unlimited rights data paid for by the Government.

Paragraph (d) of the Rights in Data—General clause (52.227.14) outlines a procedure whereby a contracting officer can challenge restrictive markings on data delivered. Under civilian agency contracts, limited rights data or restricted computer software is rarely, if ever, delivered to the Government. Therefore, there may rarely be any challenges. Thus, there is no burden on the public.

Final Effect of Designation of a Class of Employees for Addition to the Special Exposure Cohort

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: HHS gives notice concerning the final effect of the decision to designate a class of employees from Lawrence Livermore National Laboratory in Livermore, California, as an addition to the Special Exposure Cohort (SEC) under the Energy Employees Occupational Illness Compensation Program Act of 2000. On April 5, 2010, as provided for under 42 U.S.C. 7384q(b), the Secretary of HHS designated the following class of employees as an addition to the SEC:

All employees of the Department of Energy, its predecessor agencies, and their contractors and subcontractors who worked at the Lawrence Livermore National Laboratory in Livermore, California from January 1, 1950 through December 31, 1973, for a number of work days aggregating at least 250 work days, occurring either solely under this employment or in combination with work days within the parameters established for one or more other classes of employees in the Special Exposure Cohort.

This designation became effective on May 5, 2010, as provided for under 42 U.S.C. 7384(14)(C). Hence, beginning on May 5, 2010, members of this class of employees, defined as reported in this notice, became members of the Special Exposure Cohort.

FOR FURTHER INFORMATION CONTACT: Stuart L. Hinnefeld, Interim Director, Division of Compensation Analysis and Support, NIOSH, 4676 Columbia Parkway, MS C-46, Cincinnati, OH 45226, Telephone 877-222-7570. Information requests can also be submitted by e-mail to DCAS@CDC.GOV.
