Minimum Altitudes for IFR Operations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Technical amendment.

SUMMARY: The FAA is correcting the introductory text in paragraph (a) of § 91.177 that was published on August 18, 1989. The phrase, “or unless otherwise authorized by the Administrator” was inadvertently removed from paragraph (a) introductory text. This action reinstates that phrase with a minor revision.

DATES: Effective June 2, 2010.

SUPPLEMENTARY INFORMATION:

Background

On August 18, 1989 (54 FR 34288), the FAA published a final rule that revised 14 CFR part 91. In the final rule, the phrase in § 91.177 (a) introductory text “unless otherwise authorized by the Administrator” was inadvertently removed. The impact of this action was not apparent until the FAA recently amended the guidelines for establishing minimum vectoring altitudes. Without this phrase in the regulation, certain altitudes are unavailable to air traffic control. This action corrects this error with a minor revision. We are replacing the word “Administrator” with “FAA”. The new phrase will read “unless otherwise authorized by the FAA”.

Good Cause for Immediate Adoption of This Final Rule

Until recently, the FAA was unaware of the erroneous amendment to this regulation and its impact on minimum vectoring altitudes. The FAA concludes that immediate action is necessary to correct this error and therefore, finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and contrary to the public interest. Further, the FAA finds that good cause exists under 5 U.S.C. 553(d) for making this rule effective immediately upon publication.
