Establishment of Class E Airspace;
Northeast, AK**

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking
(NPRM).

SUMMARY: This action proposes to revoke and establish Class E airspace in Northeast Alaska. The recent removal of a Colored Federal Airway near Kaktovik, AK, duplication of controlled airspace near Mentasta Lake, AK, and the establishment of one Special Area Navigation Standard Instrument Approach Procedure (SIAP) at Eagle Airport, AK, have made these actions necessary to enhance safety and management of Instrument Flight Rules (IFR) operations.

Group. Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267-9677, to request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

This action proposes to amend Title 14 Code of Federal Regulations (14 CFR) part 71 by revoking and establishing Class E airspace in Northeast Alaska, to accommodate a removed Colored Federal Airway (G16), duplication of controlled airspace near Mentasta Lake, AK, and the establishment of a new Special SIAP at Eagle Airport, AK. The new Class E airspace would provide adequate controlled airspace upward from 1,200 feet above the surface, to allow commercial air operations through what is now uncontrolled airspace above 1,200 feet. Air carriers providing service to Eagle, AK, must currently operate under Visual Flight Rules (VFR). With the establishment of an instrument approach at Eagle Airport, the uncontrolled airspace primarily extending to the west from the Eagle Airport, must be converted into controlled airspace. In the case of Eagle's instrument approach, the necessary controlled airspace will not extend far enough westward to connect with controlled airspace to the west. The required airspace designation is classified as E6 Enroute Domestic Airspace and is provided for the safety and management of IFR operations access at Eagle Airport. Additionally, with the evolution and expansion of controlled airspace serving the airports of Tok Junction, Northway and Gulkana AK, the Mentasta Lake/Mountains Area Class E6 Enroute Airspace is no longer necessary.

The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6006 in FAA Order 7400.9T, *Airspace Designations and Reporting Points*, signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be subsequently published in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies

and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Because this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it proposes to revoke Class E airspace in Northeast Alaska, and establish Class E airspace to allow access at Eagle Airport, Eagle, AK, and represents the FAA's continuing effort to safely and efficiently use the navigable airspace.

RIN 1625-AA09

Drawbridge Operation Regulation; Curtis Creek, Baltimore, MD

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to change the regulations that govern the operation of the Pennington Avenue Bridge across Curtis Creek, at mile 0.9, in Baltimore, MD. The proposed rule would eliminate the need for a bridge tender by allowing the bridge to be operated from a remote location at the City of Baltimore Transportation Management Center. This proposed change would maintain the bridge's current level of operational capabilities and continue providing for the reasonable needs of vehicular transportation and vessel navigation. This proposed rule will also correct the statute mile marker of the I695 Bridge which is also across Curtis Creek in Baltimore, MD.
