

was shown to be hydraulically connected to the Columbia River and chlorination was required. Prior to installation of the Canadian-manufactured PVC pipe and completion of the proposed project, the distribution system configuration did not allow for sufficient chlorine contact time.

Without the appropriate contact time, the disinfection process could not have been completed prior to water reaching the consumers. The project originally estimated the need for 340 linear feet of large diameter 36" pipe to allow for ample and sufficient chlorine contact time to provide treatment and disinfection to the water however, after additional engineering analysis, it was noted that only 280 linear feet was needed for project specifications. EPA finds these considerations as stated by the City provide ample functional justification for their specification.

The April 28 memorandum defines "public interest" as those cases which possibly involve national implications of such a waiver. Based on additional research by EPA's consulting contractor (Cadmus), and to the best of the Region's knowledge at this time, the City attempted without success, to meet the Buy American requirements. Furthermore, the purpose of the ARRA provisions is to stimulate economic recovery by funding current infrastructure construction, not to delay projects that are already shovel ready by requiring entities, like the City, to revise their design or potentially choose a more costly and less effective project. The imposition of ARRA Buy American requirements on such projects eligible for DWSRF assistance would result in unreasonable delay and thus displace the "shovel ready" status for this project. To further delay construction is in direct conflict with the most fundamental economic purposes of ARRA; to create or retain jobs.

The Drinking Water Unit has reviewed this waiver request and has determined that the supporting documentation provided by the City is sufficient to meet the following criteria listed under section 1605(b) and in the April 28 memorandum: Applying the Buy American requirements of ARRA would be inconsistent with the public interest.

The basis for this project waiver is the authorization provided in section 1605(b)(1), due to the lack of any U.S. production of what by industry's standards is a small amount (280 linear feet) of large diameter 36" PVC pipe, in order to meet the City's design schedule and specifications. The March 31, 2009, Delegation of Authority Memorandum provided Regional Administrators with

the authority to issue exceptions to section 1605 of ARRA within the geographic boundaries of their respective regions and with respect to requests by individual grant recipients. Having reviewed all available documentation, statements, invoices, and related correspondence, EPA has established both a proper basis to specify the particular good required for this project, and that categorization of similar waiver requests from Gwinnett County, GA (granted 12/18/09) and Old Town, ME (granted 2/12/10) when the manufactured goods involved there had already been used in and incorporated into the ARRA project, that EPA has evaluated and considered the City's waiver request as of January 4, 2010 to be considered under section 1605(b)(1) authority for public interest waivers. The City is hereby granted a waiver from the Buy American requirements of section 1605(a) of Public Law 111-5 for the purchase of 280 linear feet of large diameter 36" PVC pipe. This supplementary information constitutes the detailed written justification required by section 1605(c) for waivers based on a finding under subsection (b).

Authority: Public Law 111-5, section 1605.

Dated: May 25, 2010.

Dennis J. McLerran,

Regional Administrator, EPA, Region 10.
