SUPPLEMENTARY INFORMATION:

Title: Virtual Incident Procurement (VIPR) Existing Vendor User Survey.

OMB Number: 0596–New.

Type of Request: New.

Abstract: Virtual Incident Procurement (VIPR) is an acquisition system designed to solicit, award, and manage preseason incident agreements and contracts for equipment and services at the Forest Service. Opinions and comments from existing VIPR vendor users are needed to evaluate the acquisition system leading to program improvements and to potential system functionality upgrades. For this reason, the Forest Service desires to question vendor users utilizing an online, electronic survey.

The information will be collected and analyzed by the Forest Service Acquisition Management System Branch. The Forest Service will inquire and collect surveys from existing VIPR vendor users on their individual experiences with the acquisition system, customer service support, and other supporting tools. The information will be used to assist program management enhancements, identify potential system upgrades, and improve overall customer service and other support tools. Results from the information collection may be shared with other Forest Service divisions, with agencies outside of the Forest Service, and with the public.

The authorization to survey vendors for customer service improvements comes from Executive Order 12862, issued September 11, 1993, which directs Federal agencies to change the way they do business, to reform their management practices, and to provide service to the public that matches or exceeds the best service available in the private sector. The survey will provide the Forest Service with the necessary information to meet the terms of the Executive order.

Estimate of Annual Burden: 20 minutes.

Type of Respondents: Existing VIPR vendors.

Estimated Annual Number of Respondents: 3,000.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 1,000 Hours.
