SUPPLEMENTARY INFORMATION:

Title: Marketing Orders for Fruit Crops.

OMB Number: 0581-0189.

Expiration Date of Approval: November 30, 2010.

Type of Request: Extension and Revision of a currently approved information collection.

Abstract: Marketing order programs provide an opportunity for producers of

fresh fruits, vegetables and specialty crops, in specified production areas, to work together to solve marketing problems that cannot be solved individually. This notice covers the following marketing order program citations 7 CFR parts 905 (Florida citrus), 906 (Texas citrus), 915 (Florida avocados), 916 (California nectarines), 917 (California peaches and pears), 920 (California kiwifruit), 922 (Washington apricots), 923 (Washington cherries), 924 (Oregon/Washington prunes), 925 (California table grapes), 927 (Oregon/Washington pears), and 929 (Cranberries grown in 10 States). Order regulations help ensure adequate supplies of high quality product and adequate returns to producers. Under the Agricultural Marketing Agreement Act of 1937 (Act), as amended (7 U.S.C. 601-674) industries enter into marketing order programs. The Secretary of Agriculture is authorized to oversee the order operations and issue regulations recommended by a committee of representatives from each commodity industry.

The information collection requirements in this request are essential to carry out the intent of the Act, to provide the respondents the type of service they request, and to administer the marketing order programs. Under the Act, orders may authorize the following: Production and marketing research, including paid advertising; volume regulations; reserves, including pools and producer allotments; container regulations; and quality control. Assessments are levied on handlers regulated under the marketing orders.

USDA requires several forms to be filed to enable the administration of each marketing order program. These include forms covering the selection process for industry members to serve on a marketing order's committee or board and ballots used in referenda to amend or continue marketing order programs.

Under Federal marketing orders, producers and handlers are nominated by their peers to serve as representatives on a committee or board which administers each program. Nominees must provide information on their qualifications to serve on the committee or board. Nominees are appointed by the Secretary. Formal rulemaking amendments must be approved in referenda conducted by USDA and the Secretary. For the purposes of this action, ballots are considered information collections and are subject to the Paperwork Reduction Act. If an order is amended, handlers are asked to sign an agreement indicating their

willingness to abide by the provisions of the amended order.

Some forms are required to be filed with the committee or board. The orders and their rules and regulations authorize the respective commodities' committees and boards, the agencies responsible for local administration of the orders, to require handlers and producers to submit certain information. Much of the information is compiled in aggregate and provided to the respective industries to assist in marketing decisions. The committees and boards have developed forms as a means for persons to file required information relating to supplies, shipments, and dispositions of their respective commodities, and other information needed to effectively carry out the purpose of the Act and their respective orders, and these forms are utilized accordingly.

The forms covered under this information collection require the minimum information necessary to effectively carry out the requirements of the orders, and their use is necessary to fulfill the intent of the Act as expressed in the orders rules and regulations.

The information collected is used only by authorized employees of the committees and authorized representatives of the USDA, including AMS, Fruit and Vegetable Programs' regional and headquarters' staff. Authorized committee or board employees are the primary users of the information and AMS is the secondary user.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .28 hours per response.

Respondents: Producers, handlers, processors, cooperatives, and public members.

Estimated Number of Respondents: 16,043.

Estimated Number of Responses: 30,604.

Estimated Number of Responses per Respondent: 1.91.

Estimated Total Annual Burden on Respondents: 8,419 hours.

Comments are invited on: (1) Whether the proposed collection of the information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information

on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record. All comments received will be available for public inspection at the street address in the "Comment" section and can be viewed at: <http://www.regulations.gov>.

SUPPLEMENTARY INFORMATION:

Title: Blood and Tissue Collection at Slaughtering and Rendering Establishments.

OMB Number: 0579-0212.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, is authorized to prevent the interstate spread of livestock diseases and for eradicating such diseases from the United States when feasible. In connection with this mission, the Veterinary Services (VS) program, APHIS, conducts animal disease surveillance programs, including diagnostic testing.

The regulations in 9 CFR, subchapter C, part 71, "General Provisions," provide for the collection of blood and tissue samples from livestock (horses, cattle, bison, captive cervids, sheep and goats, swine, and other farmed animals) and poultry at slaughter. Persons moving livestock and poultry interstate for slaughter may only move the animals to slaughtering or rendering establishments that have been listed by the Administrator of APHIS. Federal personnel, in conjunction with establishment personnel, are required to
