Background

Recovery of endangered or threatened animals and plants is the primary goal of the Endangered Species Act (Act) (16 U.S.C. 1531 *et seq.*) and our endangered species program. Recovery means improvement of the status of listed species to the point at which listing is no longer required under the criteria set out in section 4(a)(1) of the Act and its implementing regulations at 50 CFR 424. Recovery plans describe actions considered necessary for the conservation of listed species, establish criteria for downlisting or delisting species, and estimate time and cost for implementing the measures needed for recovery.

The Act requires the development of recovery plans for endangered or threatened species unless such a plan would not promote the conservation of the species. Section 4(f) of the Act requires public notice, and an opportunity for public review and comment, during recovery plan
