[Docket No. IC10–580–001]

Commission Information Collection Activities (FERC Form No. 580) Request; Submitted for OMB Review; Correction

June 29, 2010.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice; correction.

SUMMARY: The Federal Energy Regulatory Commission published in the **Federal Register** of June 21, 2010, a notice regarding its submission of information collection to the Office of Management and Budget for review of information collection requirements.

DATES: *Effective Date:* July 6, 2010.

FOR FURTHER INFORMATION CONTACT: Michael Miller, Office of the Deputy Chief Information Officer, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, (202) 502–8415.

SUPPLEMENTARY INFORMATION: In FR Document 2010–14953, published June 21, 2010 (75 FR 35003) make the following corrections to two tables in the notice which provide estimates of reporting burdens:

On page 35006, column 3, change the Total from “4150” to “4050.”

On page 35006, columns 2 and 3, in the table providing Form 580 data, change total from “4150” to “4050” and change the figure of “\$275,104” to “\$268,456.”

Kimberly D. Bose,
Secretary.

Federal Energy Regulatory Commission

[Project No. 13722–000]

Douglas County, OR; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

June 24, 2010.

On May 5, 2010, Douglas County, Oregon, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Douglas County Wave and Tidal Energy Power

Project, in the Pacific Ocean, off the coast of Douglas County, Oregon. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners’ express permission.

The proposed project would consist of: (1) An approximately 600-foot-long, 30-foot-wide, 46-foot-high cason to house the oscillating water column collecting system (OWCCS); (2) an OWCCS consisting of 15 oscillating water column chambers, each containing two, 110-kilowatt turbine/generator units; and (3) a 1.9- to 2.3-mile-long transmission line, depending on the final location and selection of the transmission line. The project would have a total installed capacity of 1 megawatt (MW) to 3 MW, and an estimated annual generation of 3.4 gigawatt-hours (GWh) to 10.2 GWh. The OWCCS is operated by external wave action, which causes water to oscillate up and down within an underwater chamber. As the air in the chamber above the water is compressed and decompressed, air is forced through a turbine/generator unit. There are four locations under evaluation for the proposed project installation.
