General Description of Reports

This information collection is mandatory: Sections 17A(c), 17(a)(3), and 23(a) of the Act, as amended (15 U.S.C. 78q-1(c), 78q(a)(3), and 78w(a)) (Board, FDIC and OTS); and Sections 12, 13, 14(a), 14(c), 14(d), 14(f), and 16 of the Act, as amended (15 U.S.C. 781, 78m, 78n(a), 78n(c), 78n(d), 78n(f), and 78p (OCC). Additionally, the Board's Regulation H (section 208.31(a)) and Regulation Y (section 225.4(d)), as well as § 341.3 of the FDIC's Rules and Regulations implement the provisions of the Act. The registrations are public filings and are not considered confidential.

Abstract

Section 17A(c) of the Act requires all transfer agents for securities registered under section 12 of the Act to register "by filing with the appropriate regulatory agency * * * an application for registration in such form and containing such information and documents * * * as such appropriate regulatory agency may prescribe as necessary or appropriate in furtherance of the purposes of this section." In general, an entity performing transfer agent functions for a security is required to register if the security is registered on

a national securities exchange and if the issuer has total assets of \$10 million or more and a class of equity security held of record by 500 or more persons.

Request for Comment

The Agencies invite comment on:

(a) Whether the collections of information are necessary for the proper performance of the Agencies' functions, including whether the information has practical utility;

(b) The accuracy of the Agencies' estimates of the burden of the information collections, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) Ways to minimize the burden of information collections on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be shared among the Agencies. Unless otherwise afforded confidential treatment pursuant to Federal law, all comments will become a matter of public record.

Valles Caldera Trust

Notice of Intent To Prepare an Environmental Impact Statement for a Long-Term Landscape Restoration and Management Plan To Restore and Manage the Forest, Grassland, and Riparian Ecosystems of the Valles Caldera National Preserve

Authority: The National Environmental Policy Act of 1969 (NEPA), CEQ Regulations at 40 CFR parts 1500 through 1508, The

Valles Caldera Preservation Act, Public Law 106-248, NEPA Procedures for the Valles Caldera National Preserve, 68 CFR 42460.

AGENCY: Valles Caldera Trust.

ACTION: Notice of Intent to prepare an Environmental Impact Statement.

SUMMARY: The Valles Caldera Trust (VCT) a wholly owned government corporation empowered to provide management and administrative services for the Valles Caldera National Preserve (VCNP) intends to prepare an Environmental Impact Statement (EIS) to analyze and disclose the potential impacts of a proposed Landscape Restoration and Management Plan (LRMP) which includes mechanical treatments, prescribed burning, management of lightning caused wildland fires (wildland fire use), restoration or riparian areas, closure and maintenance of roads and eradication of noxious weeds and invasive plants. A combination of these management activities are being proposed over the next 10-years as follows:

1. *Mechanical Treatments*—Mechanical treatments are being proposed on approximately 20,000 acres over 10 years depending on funding and possible adjustments based on monitoring and evaluation of treatments. These treatments include tree cutting and removing or otherwise disposing of the associated biomass. Trees may be cut using chainsaws or equipment. Feller-bunchers, masticators, or small dozers equipped with saw blades, are some of the more common types of equipment employed. Forest thinning will be implemented under prescription parameters that will specify the size, species and other parameters that would determine whether a tree will be cut or left. In general, the forests of the preserve are dominated by an excess of trees 7–16 in diameter and these trees sizes would be targeted for removal.

2. *Prescribed Fire/Wildland Fire Use*—Prescribed fire is being proposed in conjunction with the mechanical treatment described above. In addition, prescribed fire alone is being proposed on nearly 59,000 acres of forest and grassland ecosystems over a 10-year period. The management of lightning caused fires (wildland fire use) to achieve resource benefits is also being proposed. Wildland fire use would be limited initially due to the current forest condition but could increase over time as forests are treated and wildfire risk is reduced. The use of wildland fire is being proposed as a tool for restoration and management of the preserve's forests and grasslands and ultimately proposes to reintroduce fire as a

beneficial ecosystem process. The actual acres treated with prescribed fire over 10 years would depend on funding, environmental conditions—especially weather, the completion of mechanical treatments, and possible adjustments due to monitoring and evaluation results.

3. *Road Closure, Rehabilitation and Maintenance*—The closure and rehabilitation of approximately 1000 miles of roads is being proposed over the next 10 years. Administrative closures would be the primary tool used to close roads to motorized use, allowing natural rehabilitation. Approximately 150 miles of the road network requires physical rehabilitation to halt ongoing erosion. Some roads would be reduced to a maintenance level-1, rather than closed. This designation allows non-motorized use as well as temporary motorized use for administrative actions such as forest management, search and rescue, or wildland fire management.

4. In combination with road management actions as described above, the trust is also proposing to restore wetland and riparian areas throughout the preserve. The wetland and wet meadow systems containing the preserves riparian areas, and streams comprise just over 6,800 acres, mostly within the open valle systems. Restoration activities would include stream bank and channel restoration to address site specific erosion, placement of log and fabric dams, gully plugs, or Zuni bowl techniques to protect and restore wetlands. Willow plantings or placement of sod plugs are among techniques proposed for improving stream bank integrity.

5. *Prevention and Eradication of Noxious Weeds*—Under the proposed LRMP, current efforts to eradicate Canada, musk, and bull thistle populations would continue. This includes continuing to mechanically treat (cut, hoe and bag seed heads) musk thistle in combination with the application of the herbicide, clopyralid to treat Canada and bull thistle. The trust is also proposing to use clopyralid to eradicate oxeye daisy (*Leucanthemum vulgare*), and glyphosate (Roundup), Imazipic (Plateau), or the combination of both (Journey) to eradicate cheatgrass (*Bromus tectorum*) primarily in road cuts and other disturbed areas. The VCT is also proposing to implement performance requirements to reduce the risk of introducing new noxious weed species or further spread of existing species.

6. *No Treatment*—Areas of the preserve could remain untreated based
