

• Alternative 4: Divert LN Canal water into the existing LHPS Canal alignment, from Logan River to approximately 3100 North where it would be taken under the city street to 1200 East and placed back into the existing LN Canal, with service to 1400 North.

NRCS will consider any viable alternatives brought forward from initial scoping if such alternatives are substantially different from the four described above. NRCS will also study a No-Action alternative.

#### Cooperating Agencies

Because the project area includes land administered by the USDA Forest Service and because that agency might need to issue a special use permit for activity associated with one or more of the alternatives, the USDA Forest Service will participate in the Logan Northern Canal Reconstruction EIS process as a cooperating agency. Because one or more of the project alternatives could affect waters of the United States as defined by the Clean Water Act, the U.S. Army Corps of Engineers will also act as a cooperating agency.
