

incidentally harass and collect dead parts from prey including humpback, gray, minke, sei and fin whales, harbor porpoise, Dall's porpoise, Pacific white-sided dolphin, Northern fur seal (*Callorhinus ursinus*), Steller sea lion, and harbor seal (*Phoca vitulina*).

Briana Witteveen, Ph.D. [File No. 14296], University of Alaska Fairbanks, School of Fisheries and Ocean Sciences, 118 Trident Way, Kodiak, AK 99615, was issued a five-year permit to conduct scientific research on cetaceans year-round in the Gulf of Alaska, with emphasis on gray, fin, humpback, and killer whales. Takes will occur by close approach to collect photographs, recordings of vocalizations, biopsy samples, prey parts, sloughed skin, to attach suction cup tags, and to document response to acoustic deterrents. Sei, blue, minke, sperm, and right whales will be taken by close approach to collect photographs and biopsy samples. Pacific white-sided dolphins, Dall's porpoise, harbor porpoise, Steller sea lions, harbor seals, and Northern fur seals will be incidentally harassed during research activities.

Ann Zoidis [File No. 14353], Cetos Research Organization, 33 Echo Ave., Suite 5, Oakland, CA 94611, was issued a five-year permit to conduct scientific research on humpback and minke whales in Hawaiian waters. Research will occur annually from January through March. Humpback whale research will be focused in the Au'au Channel near Maui. Research activities will include photo-identification, behavioral observations, passive acoustic recording, and underwater photo/videography. Suction cup tags will be deployed on humpback whales. Minke whales will be approached for photo-identification anywhere within the main Hawaiian islands. Short-finned pilot, pygmy and dwarf sperm, pygmy killer, false killer, Cuvier's beaked, and melon-headed whales and bottlenose, Risso's, rough-toothed, spinner, and pantropical spotted dolphins will be incidentally harassed during research activities.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an environmental assessment (EA) was prepared analyzing the effects of the permitted activities on the human environment. Based on the analyses in the EA, NMFS determined that issuance of the permits and amendment will not significantly impact the quality of the human environment and that preparation of an environmental impact statement was not required. That determination is documented in a Finding of No

Significant Impact (FONSI), signed on July 14, 2010.

Issuance of these permits, as required by the ESA, was based on a finding that such permits: (1) were applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA.
