## VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the action. The existing stocks provision for the products subject to this order is specified in the Memorandum of Agreement between the EPA and registrants listed in Table 2 ([www.regulations.gov](http://www.regulations.gov)—EPA—HQ—OPP—2009—0010). The existing stocks provision is as follows: All sale, distribution and use of existing stocks of manufacturing-use products imported into the United States shall be prohibited as of December 31, 2012. In addition, as of December 31, 2012, all sale, distribution, and use of existing stocks of manufacturing-use products shall be prohibited unless the sale, distribution, or use is for purposes of export consistent with section 17 of FIFRA or for proper disposal. Registrants are prohibited from selling or distributing end-use products as of December 31, 2012, except for end-use products intended for export consistent with the requirements of section 17 of FIFRA, or for proper disposal. Persons other than the registrants are permitted to sell or distribute end-use products prior to August 31, 2013. All sale and distribution of end-use products shall be prohibited as of August 31, 2013, except for export consistent with section 17 of FIFRA or for proper disposal. Additionally, all use of existing stocks of the end-use products shall be prohibited as of December 31, 2013, except for products intended for export consistent with the requirements of section 17 of FIFRA or proper disposal. Finally, as of the effective date of this cancellation order, any permitted use of existing stocks is expressly conditioned upon such use being consistent with the terms of the previously approved labeling on or that accompanied the cancelled product.

#### Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-5960 and send comments to Maryam I. Daneshvar, CDC Reports Clearance Officer, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an e-mail to [omb@cdc.gov](mailto:omb@cdc.gov).

*Comments are invited on:* (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c)

ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

#### Proposed Project

National Electronic Disease Surveillance System (NEDSS)—(OMB Number 0920-0728 exp. 2/28/2011)—Extension—Office of the Director (OD), Centers for Disease Control and Prevention (CDC).

#### Background and Brief Description

CDC is responsible for the dissemination of nationally notifiable disease information and for monitoring and reporting the impact of epidemic influenza on mortality, Public Health Services Act (42 U.S.C. 241). In April 1984, CDC Epidemiology Program Office (EPO) in cooperation with the Council of State and Territorial Epidemiologists (CSTE) and epidemiologists in six states began a pilot project, the Epidemiologic Surveillance Project (ESP). The ESP was designed to demonstrate the efficiency and effectiveness of the computer transmission of surveillance data between CDC and the state health departments. Each state health department used its existing computerized disease surveillance system to transmit specific data concerning each case of a notifiable disease. CDC technicians developed computer software to automate the transfer of data from the state to CDC.

In June 1985, CSTE passed a resolution supporting ESP as a workable system for electronic transmission of notifiable disease case reports from the states/territories to CDC. As the program was extended beyond the original group of states, EPO began to provide software, training and technical support to state health department staff overseeing the transition from hard-copy to *fully* automated transmission of surveillance data.

By 1989, all 50 states were using this computerized disease surveillance system, which was then renamed the National Electronic Telecommunications System for Surveillance (NETSS) to reflect its national scope. Core surveillance data are transmitted to CDC by the states and territories through NETSS. NETSS has a standard record format for data

transmitted and does not require the use of a specific software program. The ability of NETSS to accept records generated by different software programs makes it useful for the efficient integration of surveillance systems nationwide.

Since 1999, the CDC, Epidemiology Program Office (EPO) has worked with CSTE, state and local public health system staff, and other CDC disease prevention and control program staff to identify information and information technology standards to support integrated disease surveillance. That effort is now focused on development of the National Electronic Disease Surveillance System (NEDSS), coordinated by CDC's Deputy Director for Integrated Health Information Systems.

NEDSS will electronically integrate and link together a wide variety of surveillance activities and will facilitate more accurate and timely reporting of disease information to CDC and the state and local health departments. Consistent with recommendations from our state and local surveillance partners as described in the 1995 report, *Integrating Public Health Information and Surveillance Systems*, NEDSS includes data standards, an internet based communications infrastructure built on industry standards. It also includes policy-level agreements on data access, sharing, burden reduction, and protection of confidentiality. To support NEDSS, CDC is supporting the development of an information system, the NEDSS Base System (NBS), which will use NEDSS technical and information standards, (<http://www.cdc.gov/od/hissb/doc/NEDSSBaseSysDescription.pdf>). CDC will receive reports from the 57 respondents (50 state, 2 cities, and 5 territorial health departments) using the NEDSS (NETSS replacement) umbrella of systems, that includes the National Electronic Telecommunications System for Surveillance (NETSS).

There are no costs to the respondents other than their time to participate in the survey.

The table below outlines the annualized burden which consists of two components. The first component is "weekly reporting" (52 weeks annually). The second component is an end of year report titled "annual reporting". The two components collectively represent the estimated annualized hours for the submitting jurisdictions.
