II. What Action is the Agency Taking?

EPA's Office of Prevention, Pesticides and Toxic Substances (OPPTS), renamed the Office of Chemical Safety and Pollution Prevention (OCSPP), as of April 22, 2010, provided notice on October 31, 1995 (60 FR 55376) (FRL-4987-3) of the establishment of the NAC/AEGL Committee with the stated charter objective as "the efficient and effective development of AEGLs and the preparation of supplementary qualitative information on the hazardous substances for Federal, State, and local agencies and organizations in the private sector concerned with [chemical] emergency planning, prevention, and response." The NAC/AEGL Committee is a discretionary Federal advisory committee formed with the intent to develop AEGLs for hazardous substances through the combined efforts of stakeholder members from both the public and private sectors in a cost-effective approach that avoids duplication of efforts and provides uniform values, while employing the most scientifically sound methods available.

This action provides notice of availability for public review and

comment of proposed AEGLs and underlying supporting documents for 13 hazardous substances. These AEGLs represent the 13th set of exposure levels proposed and published by the NAC/AEGL Committee. These 13 sets of AEGLs cover 261 hazardous substances. Background information on the AEGL Program may be found in these earlier **Federal Register** notices, on regulations.gov, or the AEGL webpage (<http://www.epa.gov/oppt/aegl>).

Following public review and comment, the NAC/AEGL Committee will reconvene to consider relevant comments, data, and information that may have an impact on the NAC/AEGL Committee's position and will again seek consensus for the establishment of Interim AEGLs. Although the Interim AEGLs will be available to Federal, State, and local agencies and to organizations in the private sector as biological reference values, a National Academies subcommittee for AEGLs will serve as a peer review of the Interim AEGLs and as the final arbiter in the resolution of issues regarding the AEGLs, and the data and basic methodology used for setting AEGLs. Following concurrence, Final AEGLs will be published under the auspices of the NAS.

III. List of Hazardous Substances

On behalf of the NAC/AEGL Committee, EPA is providing an opportunity for public comment on the proposed AEGLs for the 13 hazardous substances identified in the table in this unit. Technical Support Documents are available in the docket for this notice. See **ADDRESSES** for docket information.
