[Project No. 503–048]

Idaho Power Company; Notice of Authorization for Continued Project Operation

July 23, 2010.

On June 26, 2008, Idaho Power Company, licensee for the Swan Falls Hydroelectric Project, filed an Application for a New License pursuant to the Federal Power Act (FPA) and the Commission's regulations thereunder. The Swan Falls Hydroelectric Project is on the Snake River in Ada and Owyhee counties of southwestern Idaho.

The license for Project No. 503 was issued for a period ending June 30, 2010. Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year to year an annual license to the then licensee under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of section 15 of the FPA, then, based on section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to section 15 of the FPA, notice is hereby given that an annual license for Project No. 503 is issued to Idaho Power Company for a period effective July 1, 2010 through June 30, 2011, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first. If issuance of a new license (or other disposition) does not take place on or before June 30, 2011, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise.

¹ NYISO Working Groups often meet on an as-needed basis and groups are also created and dissolved on an as-needed basis. Therefore, staff may monitor different groups from month-to-month accordingly.

If the project is not subject to section 15 of the FPA, notice is hereby given that Idaho Power Company is authorized to continue operation of the Swan Falls Hydroelectric Project, until such time as the Commission acts on its application for a subsequent license.

Kimberly D. Bose,

Secretary.

[Docket No. CP10-89-000]

East Tennessee Natural Gas, LLC; Notice of Availability of the Environmental Assessment for the Proposed Northeastern Tennessee Project

July 23, 2010.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Northeastern Tennessee Project proposed by East Tennessee Natural Gas (ETNG) in the above referenced docket. ETNG requests authorization to construct, replace and abandon natural gas pipeline transmission facilities in southwestern Virginia and northeastern Tennessee to provide natural gas service for the Tennessee Valley Authority's recently approved John Sevier Combined Cycle Plant.

The EA assesses the potential environmental impacts resulting from construction and operation of the proposed Northeastern Tennessee Project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed Northeastern Tennessee Project includes:

- Replacing approximately 11.5 miles of existing 12-inch- and 8-inch-diameter natural gas transmission pipeline with 24-inch-diameter natural gas transmission pipeline;
- Installing approximately 16.4 miles of new 24-inch-diameter natural gas pipeline;
