

being collected to assure compliance with 40 CFR part 63, subpart DDDD, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that has been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 21 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Plywood and composite products.

Estimated Number of Respondents: 228.

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 11,680.

Estimated Total Annual Cost: \$1,120,813 which includes \$1,104,853 in labor costs, no capital/startup costs, and \$15,960 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment in the labor hour burden in this ICR compared to the previous ICR. The labor burden is decreased compared to the most recently approved ICR because the industry is experiencing a flat production with no new facilities anticipated in the three years of this ICR. In addition, the new facilities in the previous ICR have become existing facilities. Existing facilities must demonstrate and report continuing compliance with the requirement.

There is a decrease in the capital/startup and O&M costs compared to the

previous ICR because there are no new facilities that must purchase continuous monitoring equipment.

Dated: July 30, 2010.

Director, Collection Strategies Division.

FEDERAL COMMUNICATIONS COMMISSION

[CG Docket No. 10-145; DA 10-1324]

Accessible Mobile Phone Options for People Who Are Blind, Deaf-Blind, or Have Low Vision

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In this document, the Commission, via the Wireless Telecommunications Bureau and the Consumer and Governmental Affairs Bureau ("the Bureaus"), seeks input from all stakeholders in order to be fully informed on issues raised by consumers and to determine the appropriate next steps to achieve telecommunications access. The Bureaus seek input on the following issues: The wireless phone features and functions in the current marketplace that are not accessible for people who are blind, have vision loss, or are deaf-blind and the extent to which gaps in accessibility are preventing wireless communication access by these populations; the cost and feasibility of technical solutions to achieve wireless accessibility for these populations; reasons why there are not a greater number of wireless phones—particularly among less expensive or moderately-priced handset models—that are accessible to people who are blind or have vision loss; technical obstacles, if any, to making wireless technologies compatible with Braille displays, as well as the cost and feasibility of technical solutions to achieve other forms of compatibility with wireless products and services for people who are deaf-blind; recommendations on the most effective and efficient technical policy solutions for addressing the needs of consumers with vision disabilities, including those who are deaf-blind; and recommendations on actions that the Bureaus or the Commission should take to address the current lack of access. For example, is additional guidance needed on specific access features that should be included in wireless products? Should the Bureaus or the Commission facilitate a dialogue among stakeholders

in order to reach a specific agreement to address the accessibility concerns outlined herein?

DATES: Comments are due on or before September 13, 2010. Reply comments are due on or before September 30, 2010.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554. Pursuant to 47 CFR 1.415 and 1.419, interested parties may file comments and reply comments regarding document DA 10-145 on or before the dates indicated on the first page of this document. You may submit comments, identified by [CG Docket number 10-145] by any of the following methods:

- **Electronic Filers:** Comments may be filed electronically using the Internet by accessing the Commission's Electronic Comment Filing System (ECFS) <http://fjallfoss.fcc.gov/ecfs2/> or the Federal eRulemaking Portal: <http://www.regulations.gov>. Synopsis

On May 13, 2010, the Bureaus held a workshop on "Expanding Disability Access with Wireless Technologies" (Wireless Access Workshop) to learn more about mobile communications issues facing people with disabilities and the ways in which new technologies can offer opportunities to meet the communications access needs of this community. Participants included stakeholders from the disability community, industry, academia, and non-profit organizations. On June 15, 2010, the Consumer and Governmental Affairs Bureau met with

twelve members of the deaf-blind community, along with representatives of the Helen Keller National Center and the American Association of the Deaf-Blind. The purpose of this meeting was to discuss telecommunications and Internet barriers experienced by this population.

Based on the input that Commission staff received during these events, along with the record developed in conjunction with the National Broadband Plan, the Bureaus are concerned that people who are blind or have other vision disabilities have few accessible and affordable wireless phone options. More specifically, according to statements made at the workshop, the vast majority of mobile telephones are not accessible to this population without the addition of expensive software. The Bureaus are also concerned that many wireless technologies may not be compatible with Braille displays needed by individuals who are deaf-blind. In addition, according to the participants of the June 15th meeting, many specialized technologies needed to enable wireless telecommunications access for the deaf-blind community are cost prohibitive and difficult to find.
