SUPPLEMENTARY INFORMATION:

Collection of Information

Title: U.S. Fire Administration's National Fire Academy Evaluation Collection.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660-0032.

Form Titles and Numbers: FEMA Form 064-0-4, NFA Distance Learning Course Evaluation Form; FEMA Form 064-0-5, NFA End of Course Evaluation Form; FEMA Form 064-0-10, USFA Conference/Symposium Form.

Abstract: The NFA End of Course Evaluation Form is used to evaluate all traditional classroom based course deliveries and conference/symposia supporting programmatic initiatives. Data provided by students is used to determine the need for course

improvements and the degree of student satisfaction with the training experience. Participant stakeholder data provides necessary information in consideration of program revision and development initiatives and evaluates if the information met their needs.

Affected Public: State, local or tribal government.

Estimated Number of Respondents: 54,600.

Frequency of Response: On occasion.

Estimated Average Hour Burden per Respondent: .14 burden hours.

Estimated Total Annual Burden Hours: 7,590 burden hours.

Estimated Cost: There are no record keeping, capital, start-up or maintenance costs associated with this information collection.

Lawann Johnson,

Acting Director, Records Management Division, Mission Support Bureau, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS-R2-ES-2010-N138; 20124-1113-0000-F5]

Emergency Exemption; Issuance of Emergency Permit to Rehabilitate Sea Turtles Affected by the Deepwater Horizon Oil Spill, Gulf of Mexico

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of issuance of endangered species emergency permit.

SUMMARY: On April 20, 2010, a massive oil spill occurred as a result of the

Deepwater Horizon drilling rig explosion in the Gulf of Mexico. The oil spill continues to threaten the Gulf of Mexico environment and its inhabitants, including five sea turtle species. We, the U.S. Fish and Wildlife Service have authorized Texas State Aquarium, under an Endangered Species Act (ESA) permit, to aid sea turtles affected by the oil spill.

ADDRESSES: Documents and other information concerning the permit are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act. Documents will be available for public inspection, by appointment only, during normal

business hours at the U.S. Fish and Wildlife Service, 500 Gold Ave., SW., Room 6034, Albuquerque, NM 87103.

FOR FURTHER INFORMATION CONTACT: Susan Jacobsen, Chief, Endangered Species Division, P.O. Box 1306, Albuquerque, NM 87103; (505) 248-6920.

SUPPLEMENTARY INFORMATION: On April 20, 2010, a massive, oil spill occurred as a result of the Deepwater Horizon drilling rig explosion in the Gulf of Mexico off the State of Louisiana, near the Mississippi River Delta. The oil spill continues to threaten the Gulf of Mexico environment and its inhabitants, including the following five species of sea turtles: The green sea turtle (*Chelonia mydas*), hawksbill sea turtle (*Eretmochelys imbricata*), Kemp's ridley sea turtle (*Lepidochelys kempii*), leatherback sea turtle (*Dermochelys coriacea*), and loggerhead sea turtle (*Caretta caretta*).

We, the U.S. Fish and Wildlife Service (Service) have authorized Texas State Aquarium, under an Endangered Species Act (ESA) section 10(c) permit (TE794593), to aid sea turtles affected by the Deepwater Horizon oil spill. Efforts to rehabilitate the turtles are currently taking place and will continue to be an ongoing process until we are satisfied that the sea turtles no longer need rehabilitation.

Rehabilitation may include the following activities: Examine and document stranded sea turtles; aid with holding/restraining live turtles while others permitted rush to the scene, examine tags, apply tags, collect data/specimens, or attach satellite transmitters; examine for tags and tag live sea turtles; transport live and dead sea turtles to rehabilitation facilities, satellite transmitter attachment sites, and necropsy sites and necropsy dead sea turtles and collect samples; examine gut contents from dead sea turtles; attach satellite transmitters to nesting Kemp's ridley turtles; locate egg chambers and retrieve eggs for protected incubation; provide care for incubating sea turtle eggs; release hatchling sea turtles; examine unhatched eggs and collect tissue/gonad samples; capture juvenile sea turtles in nets and collect associated data; collect blood samples from stranded, nesting, and captured sea turtles; and collect small tissue samples from live stranded, nesting, and captured sea turtles.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: August 3, 2010.

Joy E. Nicholopoulos,
Regional Director, Southwest Region, Fish and Wildlife Service.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

National Park Service

Final General Management Plan/ Environmental Impact Statement, Cumberland Gap National Historical Park, Kentucky, Tennessee and Virginia

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of Availability.

SUMMARY: Pursuant to 42 U.S.C. 4332(2)(C) of the National Environmental Policy Act of 1969 the National Park Service (NPS) announces the availability of a Final General Management Plan and Environmental Impact Statement for the Cumberland Gap National Historical Park, Kentucky, Tennessee, and Virginia.

Consistent with NPS laws, regulations, and policies and the purpose of the Cumberland Gap National Historical Park, the Final GMP/EIS describes the NPS preferred alternative—Alternative C—to guide the management of the National Historical Park over the next 15 to 20 years. The preferred alternative incorporates various management prescriptions to ensure protection, access and enjoyment of the park's resources.

The Final GMP/EIS describes the NPS preferred alternative and the potential environmental consequences of implementing the preferred alternative. Impact topics include the cultural, natural, and socioeconomic environments. The Final GMP/EIS contains NPS responses to public comments on the Draft GMP/EIS, and copies of agency correspondence and substantive comment letters.

DATES: The National Park Service will execute a Record of Decision (ROD) no sooner than 30 days following publication by the Environmental Protection Agency of its Notice of Availability of the Final GMP/EIS in the **Federal Register**.

ADDRESSES: The document will be available for public review and comment online at <http://parkplanning.nps.gov>. A limited number of CDs and hard copies will be made available at National Historical Park headquarters. You may also request a hard copy or CD by contacting

Cumberland Gap National Historical Park, U.S. 25E South, P.O. Box 1848, Middlesboro, KY 40965-1848; telephone 606-248-2817.

SUPPLEMENTARY INFORMATION: The Draft GMP/EIS evaluated 3 alternatives. Alternative A (No Action) provides a baseline evaluation of existing resource conditions, visitor use, facilities, and management at the park. Alternative A would continue the current management practices into the future. There would be only minor changes in resources management, visitor programs, or facilities. Under Alternative B opportunities for visitor access would be increased by providing additional park facilities as compared to Alternative A. This would expand visitor use of the park, while avoiding and minimizing potential adverse effects on natural and cultural resources. This would be achieved by strategically locating and limiting the numbers and types of new facilities, primarily within the newly established Developed Zones at Fern Lake, areas adjacent to the Hensley Settlement, the Visitor Center area, and the Wilderness Campground. Alternative C would provide a greater amount of visitor access and facilities in the park as compared to Alternative A. Alternative C would also feature increased levels of education, outreach, and formalized partnering. Otherwise, Alternative C would be similar to Alternative B in that it provides slightly expanded visitor access to the park while minimizing the potential for adverse effects on resources. New facilities would be sited and designed within their cultural and natural settings and context. Sustainable practices would be implemented and new facilities would be designed to be unobtrusive.

The Draft GMP/EIS was available for public and agency review from October 16, 2009, through January 8, 2010. Copies of the document were sent to individuals, agencies, organizations, and local libraries. The document was also made available for public review at the park and on the NPS Planning, Environment, and Public Comment Web site (<http://parkplanning.nps.gov>) in October 2009. Public meetings were held in the Cumberland Gap National Historical Park visitor center auditorium on December 8, 2009 and December 9, 2009. During the review period, the NPS accepted written and oral comments on the document. The NPS carefully reviewed all comments and prepared a report on responses to all substantive comments (Chapter 6). The Final General Management Plan sets forth a vision for the development and
