

September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order. With the exception of editorial changes, and the changes described above, this rule is the same as that proposed in the NPRM.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 establishes the Class E airspace extending upward from 700 feet above the surface at Williamson, WV, to provide controlled airspace required to support the SIAPs developed for Mingo County Regional. The geographic coordinates for the airport will be adjusted to coincide with the FAA's National Aeronautical Navigation Services. This action is necessary for the safety and management of IFR operations at the airports.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E airspace at Williamson, WV.

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9T, Airspace Designations and Reporting Points, signed August 27, 2009, effective September 15, 2009, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

Automatic Dependent Surveillance–Broadcast (ADS–B) Out Performance Requirements To Support Air Traffic Control (ATC) Service; OMB Approval of Information Collection

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; OMB approval of information collection.

SUMMARY: This document notifies the public of the Office of Management and Budget's (OMB's) approval of the information collection requirement contained in the FAA's final rule, "Automatic Dependent Surveillance–Broadcast (ADS–B) Out Performance Requirements To Support Air Traffic Control (ATC) Service," which was published on May 28, 2010.

DATES: The effective date of the final rule published on May 28, 2010, is August 11, 2010. However, because it contained new information collection requirements, compliance with the information collection provisions contained in § 91.225 was not required until they were approved by OMB. This document announces that OMB approval was received on July 29, 2010.

SUPPLEMENTARY INFORMATION: On May 28, 2010, the final rule, "Automatic Dependent Surveillance–Broadcast (ADS–B) Out Performance Requirements To Support Air Traffic Control (ATC) Service," was published in the **Federal Register** (75 FR 30160). In that rule, the FAA amended its regulations by adding equipage requirements and performance standards for Automatic Dependent Surveillance–Broadcast (ADS–B) Out avionics on aircraft operating in Classes A, B, and C airspace, as well as certain other specified classes of airspace within the U.S. National Airspace System (NAS).

In the **DATES** section of the final rule, the FAA noted that affected parties were not required to comply with the new information collection requirements in § 91.225 until OMB approved the FAA's request to collect the information. The regulation requires persons operating in the specified airspace to equip with Automatic Dependent Surveillance–Broadcast (ADS–B) Out avionics that continuously transmits aircraft information via automation for use in providing air traffic surveillance services. That information collection

requirement had not been approved by OMB at the time of publication.

In accordance with the Paperwork Reduction Act, the FAA submitted a copy of the information collection requirements to OMB for its review. OMB approved the collection on July 29, 2010, and assigned the information collection OMB Control Number 2120-0728, which expires on July 31, 2013.

This document is being published to inform affected parties of the approval, and to announce that as of July 29, 2010, affected parties are required to comply with the information collection requirements in § 91.225.

Issued in Washington, DC, on August 6, 2010.
