Title of Collection: Evaluation of the Robert Noyce Teacher Scholarship Program.

OMB Control No.: 3145-(NEW).

Abstract: The National Science Foundation (NSF) requests a three-year clearance for research, evaluation and data collection (e.g., surveys and interviews) about the Noyce Program. NSF established the Robert Noyce Teacher Scholarship Program to encourage talented STEM majors and professionals to become K-12 mathematics and science teachers. The Noyce Program awards scholarships, stipends, fellowships and internships to support the preparation of K-12 teachers in mathematics and science. For specific details and the most updated information regarding Noyce program operations, please visit the NSF Web site at: http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5733.

The study will survey Principal Investigators of the Noyce Program, Science, Technology, Engineering, or Mathematics (STEM) Faculty involved in the Noyce Program, Noyce Recipients, and K-12 Principals in schools where former recipients are teaching. Noyce recipients may be undergraduates majoring in a science, technology, engineering, or mathematics (STEM) discipline; STEM post-baccalaureates; STEM professionals; or exemplary mathematics and science teachers, who have master's degrees. The Noyce program evaluation will include all awards made between 2003 and 2009.

NSF has contracted a program evaluation of the Noyce Program, to be conducted by Abt Associates Inc. Through this evaluation of the Noyce Program, NSF aims to examine and document:

(1) The strategies and programs Noyce grantees use to recruit and retain teacher candidates, both during teacher preparation and during the induction period;

¹ 45 CFR 1622.5(a)—Relate solely to the internal personnel rules and practices of the Corporation.

(2) The institutional change occurring within STEM departments regarding the preparation of future mathematics and science teachers;

(3) The relationships between characteristics of the Noyce Program, types of Noyce recipients, characteristics of the schools in which Noyce recipients teach, and recipients' plans to teach in high-need schools and to pursue leadership roles; and

(4) The impacts of the Noyce program on teacher recruitment and retention and on teacher effectiveness.

The methods of data collection will include both primary and secondary data collections. Primary data collection will include surveys and telephone interviews; secondary data sources include open sources, records at NSF and grantee institutions, and state departments of education and teacher retirement funds. There is a bounded (or limited) number of respondents within the general public who will be affected by this research, including current and former Noyce grantees and associated faculty, STEM majors, post-baccalaureates, or professionals eligible who are supported by Noyce funding, and K–12 principals and district administrators. NSF will use the Noyce program evaluation data and analyses to respond to requests from Committees of Visitors (COV), Congress and the Office of Management and Budget, particularly as related to the Government Performance and Results Act (GPRA) and the Program Assessment Rating Tool (PART) or its replacement. NSF will also use the program evaluation to share the broader impacts of the Noyce program with the general public.

Respondents: Individuals, Federal Government, State, Local or Tribal Government and not-for-profit institutions.

Estimated Number of Respondents: 5000.

Burden on the Public: 2400 hours.

Dated: August 6, 2010.

Reports Clearance Officer, National Science Foundation.

SUPPLEMENTARY INFORMATION: On 30 March 2009, President Barack Obama signed into law the Integrated Coastal and Ocean Observation Act of 2009. Among the requirements in the Act is a directive to the National Ocean Research Leadership Council (NORLC) to develop a Public-Private Use Policy. In April 2007 the NORLC jointly agreed with the Committee on Ocean Policy supporting body, the Interagency Committee on Ocean Science and Resource Management Integration (ICOSRMI), to allow future actions taken by ICOSRMI to be deemed actions of the NORLC for the purpose of maintaining interagency progress. The IOOC, the federal interagency group established to

lead the interagency planning and coordination of ocean observing activities including IOOS, is represented by seventeen federal agencies, with NOAA identified as the lead federal agency by the Administration. As defined in the IOOC Charter, the purpose of the IOOC is to advise and assist the JSOST on matters relating to all aspects of ocean observations within the scope of an end-to-end concept of ocean observations. The JSOST is under the governance of the NORLC and, by the April 2007 agreement, the ICOSRMI.
