

In addition, when fully operational, this project could potentially provide GRC's Plum Brook Station and Lewis Field with a renewable electrical supply which would assist NASA in meeting Executive Order 13423 (Strengthening Federal Environmental, Energy, and Transportation Management), requiring 7.5% of all electrical energy used agencywide to come from renewable energy sources by the year 2013. This 7.5% goal equates to approximately 14 megawatts. All of NASA's agency assets currently receive 6.5 megawatts of electrical power from renewables, thus leaving a shortfall of 7.5 megawatts in meeting the 2013 target. Because Executive Order 13423 provides for a double credit if the renewable energy is produced on federal property, Glenn can apply 3.8 megawatts of the wind farm output to completely meet the total agency requirement.

NASA has identified an approximately 2,000-acre tract along the east-central portion of the 6,400-acre Plum Brook Station for initial consideration for wind farm development. This area was determined based on consideration of the GRC Master Plan, ongoing and planned activities, known wildlife areas, and consideration of a potential future aircraft runway.

Currently under consideration are alternatives to the Proposed Action that will be discussed in this EIS. They include, but are not limited to, the no-action alternative, a wind farm design featuring full build-out of 20 to 30 wind turbines, and an alternative featuring an intermediate wind farm design based on Ohio Power Siting Board setbacks and other siting constraints.

The EIS will consider the potential impacts associated with construction and operation of the Wind Farm Project. Science Applications International Corporation of Germantown, Maryland, has been contracted to support NASA's preparation of this EIS and implementation of associated scoping activities.

Written public input and comments on environmental impacts associated with the proposed Wind Farm Project are hereby solicited. Written comments, statements, and or questions regarding the alternatives or environmental impacts should identify issues or suggest topics to be included in this EIS.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-305; NRC-2010-0041]

### Dominion Energy Kewaunee, Inc. Kewaunee Power Station; Notice of Availability of the Final Supplement 40 to the Generic Environmental Impact Statement for License Renewal of Nuclear Plants Regarding the License Renewal of Kewaunee Power Station

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has published a final plant-specific supplement to the *Generic Environmental Impact Statement for License Renewal of Nuclear Plants* (GEIS), NUREG-1437, regarding the renewal of Operating License DPR-43 for an additional 20 years of operation for Kewaunee Power Station (KPS). The KPS site is located on the shore of Lake Michigan, approximately 27 miles east-southeast of Green Bay, WI. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

As discussed in Section 9.4 of the final supplement, the staff determined that the adverse environmental impacts of license renewal for KPS are not great enough to deny the option of license renewal for energy-planning decision makers. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report submitted by Dominion Energy Kewaunee, Inc.; (3) consultation with Federal, State, and local agencies; (4) the staff's own independent review; and (5) consideration of public comments received during scoping and on the draft Supplemental Environmental Impact Statement.

The final Supplement 40 to the GEIS is publicly available at the NRC Public Document Room (PDR), located at One White Flint North, Public File Area O-1F21, 11555 Rockville Pike, Rockville,

Maryland 20852, or from the NRC's Agencywide Documents Access and Management System (ADAMS). The ADAMS Public Electronic Reading Room is accessible at <http://www.nrc.gov/reading-rm/adams.html>. The accession number for the final Supplement 40 to the GEIS is ML102280229. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC's PDR reference staff by telephone at (800) 397-4209 or (301) 415-4737, or by e-mail at [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov). In addition, the Kewaunee Public Library, 822 Juneau Street, Kewaunee, Wisconsin 54216, has agreed to make the final supplement available for public inspection.
