

Environmental Impact Statement

The EIS will consider three alternatives: The proposed action (establishment of the GCP), no action (no project/no section 10 permit), and continuing to process HCPs in yearly batches of applications, as we do currently. A detailed description of the proposed action and alternatives in the ABM GCP will be included in the EIS. The EIS will also identify potentially significant impacts on biological resources, land use, air quality, water quality, water resources, economics, and other environmental resource issues that could occur directly or indirectly with implementation of the proposed action and alternatives. Different strategies for avoiding, minimizing, and mitigating the impacts of incidental take may also be considered.

The primary purpose of the scoping process is to identify important issues raised by the public related to the proposed action.

Public Comments

Outside of the public hearings, we will accept comments in written form only. To ensure that we identify the full range of issues related to the permit application, we invite written comments from interested parties. Please reference the ABM GCP in such comments.
