SUPPLEMENTARY INFORMATION:

I. Abstract

NASA's portfolio of higher education projects aims to educate students, support the research and professional development of faculty and administrators, and enhance research and education capacity at institutions of higher education with the ultimate goal of strengthening the Nation's aerospace and aerospace-related science, technology, engineering, and mathematics (STEM) workforce. NASA intends to conduct a multi-staged evaluation of their cumulative investments in these higher education projects. Phase one of this evaluation will collect data on the degree completion and career placement of individuals who previously participated in a NASA project as an undergraduate or graduate student. Data from this collection will be used by NASA to respond to OMB and congressional inquiries, document the education and employment outcomes of NASA's higher education investments, and inform decisions about future project modifications and funding priorities.

II. Method of Collection

Data will be collected by means of a Web-based survey of former students who participated in or applied to NASA's higher education projects and telephone interviews of a sample of these students.
