

contained in their contracts with EPA and in EPA's confidentiality regulations found at 40 CFR part 2, subpart B. Information submitted under a claim of business confidentiality is handled in accordance with EPA's regulations at 40 CFR part 2, subpart B and in accordance with EPA procedures, including comprehensive system security plans (SSPs), that are consistent with those regulations. When EPA has determined that disclosure of information claimed as CBI to contractors is necessary, the corresponding contract must address the appropriate use and handling of the information by the contractor and the contractor must require its personnel who require access to information claimed as CBI to sign written non-disclosure agreements before they are granted access to data.

Westat will adhere to EPA-approved security plans which describe procedures to protect CBI. Westat will apply the procedures in these plans to CBI previously gathered by EPA and to CBI that may be gathered in the future. The security plans specify that contractor personnel are required to sign non-disclosure agreements and are briefed on appropriate security procedures before they are permitted access to CBI. No person is automatically granted access to CBI: A need to know must exist.

The information that will be transferred to Westat consists of information previously collected by EPA to support the development and review of effluent limitations guidelines and standards under the CWA. In particular, information, including CBI, collected for the planning, development, and review of effluent limitations guidelines and standards for the following industries may be transferred: Airport deicing; aquaculture; centralized waste treatment; concentrated animal feeding operations; coal mining; construction and development; drinking water treatment; industrial container and drum cleaning; industrial laundries; industrial waste combustors; iron and steel manufacturing; landfills; meat and poultry products; metal finishing; metal products and machinery; nonferrous metals manufacturing; oil and gas extraction (including coalbed methane); ore mining and dressing; organic chemicals, plastics, and synthetic fibers; pesticide chemicals; petroleum refining; pharmaceutical manufacturing; pulp, paper, and paperboard manufacturing; steam electric power generation; textile mills; timber products processing; tobacco; and transportation equipment cleaning.

EPA also intends to transfer to Westat all information listed in this notice, of the type described above (including CBI) that may be collected in the future under the authority of section 308 of the CWA or voluntarily submitted (*e.g.*, in comments in response to a **Federal Register** notice), as is necessary to enable Westat to carry out the work required by its contract to support EPA's effluent guidelines planning process and the development of effluent limitations guidelines and standards.
