

CPC and requires CPC to inform EPA of its choice of compliance option within 30 days from the effective date of the decree.

Under Option 1, CPC will construct a new Kiln 6 as authorized by an Arizona Department of Environmental Quality permit within a 42-month time period and permanently shut down kilns 1–4 within six months of commencing operation of Kiln 6.

Under Option 2, CPC will continue to operate Kilns 1 through 4 but will install Particulate Matter controls (enclosures, spraybars and upgrades to existing baghouses) and accept more stringent limits than those already in the permit on equipment previously modified. Option 2 requires stricter opacity standards for some limestone storage piles, mill feed hoppers, and mill rejects bins. Option 2 also imposes lower emission limits on various baghouses and dust collectors and requires the installation of a bag leak detection system.

Option 2 also requires CPC to install software to optimize the operation of the existing kilns, which EPA expects will lead to reduced fuel use and reduced combustion emissions.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov or mailed to P.O.
