

DEPARTMENT OF HOMELAND SECURITY**Coast Guard****33 CFR Part 165**

[Docket No. USCG-2010-0021]

RIN 1625-AA87

Security Zone; U.S. Coast Guard BSU Seattle, Pier 36, Seattle, WA; Correction**AGENCY:** Coast Guard, DHS.**ACTION:** Final rule; technical correction.

SUMMARY: The Coast Guard published a final rule in the *Federal Register* on August 31, 2010 which created a security zone around the U.S. Coast Guard Base Support Unit Seattle, Pier 36, on Elliot Bay in Seattle, WA. This correction document provides more precise coordinates to match the geographic description of the zone provided in the final rule to better depict the boundaries of the security zone for charting purposes. This document makes that change to the subject final rule security zone which, as described in the preamble of the final rule, extends from the north western tip of Pier 36 across the inlet to the south western tip of Pier 36, effectively closing off the access point such that unauthorized vessels are prohibited from entering the pier.

DATES: This amendment is effective on November 1, 2010 and is applicable beginning September 30, 2010.

FOR FURTHER INFORMATION CONTACT: If you have questions on this correction, call or e-mail LTJG Ashley M. Wanzer, Waterways Management Division, Coast Guard Sector Puget Sound; telephone 206-217-6175, e-mail SectorSeattleWWM@uscg.mil.

SUPPLEMENTARY INFORMATION: The Coast Guard published a document in the *Federal Register* of August 31, 2010, (75 FR 53195), which added 33 CFR 165.1334. The coordinates used in that section and in the preamble did not describe the security zone precisely enough for charting purposes. This document corrects that error.

The rule published on August 31, 2010, (75 FR 53195) contained inaccurate coordinates in § 165.1334(a). This correction document revises paragraph (a) to contain the correct coordinates.

Fisheries Off West Coast States; Pacific Coast Groundfish Fishery Management Plan; Amendments 20 and 21; Trawl Rationalization Program; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; correction.

SUMMARY: This final rule corrects trip limits for commercial groundfish fisheries through the end of 2010 to reflect recent changes that were implemented on October 4, 2010. This final rule is necessary to ensure that the correct trip limit tables remain effective after November 1, 2010.

DATES: This rule is effective November 1, 2010.

SUPPLEMENTARY INFORMATION:

Background

On October 1, 2010, NMFS published a final rule (75 FR 32994, 100212086-0354-04) that implemented certain key components necessary for issuance of permits and endorsements in time for use in the 2011 fishery and in order to have the 2011 specifications reflect the new allocation scheme (the "Initial Issuance Final Rule"). In addition, that rule restructured the entire Pacific Coast groundfish regulations to more closely track the organization of the proposed management measures and to make the total groundfish regulations more clear.

On October 4, 2010, NMFS published inseason adjustments, effective October 1, 2010, to commercial trip limits that were recommended by the Pacific Fishery Management Council (Council) at its September 10-16, 2010 meeting in Boise, ID. These changes in the trip limit tables included increases for the remainder of the year to bimonthly cumulative limits in the limited entry trawl commercial fisheries off Washington, Oregon, and California, and reductions to daily trip limits (DTL) for sablefish in the limited entry fixed gear and open access commercial fisheries south of 36° N. lat.

The trip limit tables that published in the October 1, 2010, initial issuance final rule did not include the October 4, 2010, inseason changes to commercial trip limits. Without action to correct the trip limit tables in the initial issuance final rule, the inseason adjustments in the October 4, 2010, inseason final rule will be undone on November 1, 2010, when the initial issuance final rule becomes final.

Accordingly, this final rule corrects the trip limit tables in the trawl fishery for sablefish, shortspine and longspine thornyheads, Dover sole, arrowtooth flounder and other flatfish (Table 1 North and Table 1 South to Part 660, Subpart D) consistent with the October 4, 2010, inseason changes. This final rule also corrects the trip limit tables in the limited entry fishery south of 36° N. lat. (Table 2 South to Part 660, Subpart E) and open access fisheries (Table 3 South to Part 660, Subpart F) south of 36° N. lat. for sablefish consistent with October 4, 2010 inseason changes.

Classification

For the following reasons, NMFS finds good cause to waive prior notice and comment and the 30-day delay in effectiveness pursuant to 5 U.S.C. 553 so that this correction is effective on November 1, 2010, concurrent with the October 1, 2010, initial issuance final rule (75 FR 32994).

The correction to the trip limit tables in the limited entry trawl fishery must

be implemented in a timely manner to allow fishermen an opportunity to achieve the 2010 OYs specified for sablefish, longspine and shortspine thornyheads, Dover sole, arrowtooth flounder, other flatfish, and slope rockfish. Increases are necessary to relieve a restriction by allowing fishermen increased opportunities to harvest available healthy stocks while staying within the OYs for all species. These corrections must be implemented in a timely manner, as quickly as possible, so that fishermen are allowed consistent, increased opportunities to harvest available healthy stocks and meet the objective of the Pacific Coast Groundfish FMP to allow fisheries to approach, but not exceed, OYs.

Corrections to restrict cumulative limits in the limited entry fixed gear and open access sablefish DTL fishery are needed to prevent the 2010 sablefish OY in the area South of 36° N. lat. from being exceeded and prevent premature closure of fisheries that take sablefish. This correction must be implemented in a timely manner by November 1, 2010.

Failure to correct the October 4, 2010, trip limit restrictions by November 1, 2010, would risk premature closure of fisheries that are important to coastal communities, which would fail to meet the objectives of the Pacific Coast Groundfish FMP to allow for year round fishing opportunities to provide community stability.

These corrections are needed to keep the harvest of groundfish species within the harvest levels projected for 2010, while allowing fishermen access to healthy stocks. Without these measures in place, the fisheries could risk exceeding harvest levels, causing early and unanticipated fishery closures and economic harm to fishing communities. Delaying this correction would put management measures in place that are not based on the best available data and that could lead to early closures of the fishery if harvest of groundfish exceeds levels projected for 2010. Such delay would impair achievement of one of the Pacific Coast Groundfish FMP objectives of providing for year-round harvest opportunities or extending fishing

opportunities as long as practicable during the fishing year.

 3/ "Other flatfish" are defined at § 660.11 and include butter sole, curffin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.
 4/ The minimum size limit for lingcod is 22 inches (56 cm) total length North of 42° N. lat. and 24 inches (61 cm) total length South of 42° N. lat.
 5/ "Other fish" are defined at § 660.11 and include sharks, skates (including longnose skate), ratfish, morids, grenadiers, and kelp greenling. Cabezon is included in the trip limits for "other fish."
 6/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours, and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to the RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.
 7/ The "modified" fathom lines are modified to exclude certain petrale sole areas from the RCA.
 8/ If a vessel has both selective flatfish gear and large or small footrope gear on board during a cumulative limit period (either simultaneously or successively), the most restrictive cumulative limit for any gear on board during the cumulative limit period applies for the entire cumulative limit period.

TABLE 2 (South)

1/ "Other flatfish" are defined at § 660.11 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.
 2/ POP is included in the trip limits for minor slope rockfish. Yellowtail is included in the trip limits for minor shelf rockfish. Bronzespotted rockfish have a species specific trip limit.
 3/ The minimum size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.
 4/ "Other fish" are defined at § 660.11 and include sharks, skates (including longnose skates), ratfish, morids, grenadiers, and kelp greenling.
 5/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

45	<p>Groundfish: 300 lb/trip. Trip limits in this table also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57.50' N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curlfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 31).</p>					
46	PINK SHRIMP NON-GROUNDFISH TRAWL GEAR (not subject to RCAs)					
47	South	<p>Effective April 1 - October 31: Groundfish: 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/ month (minimum 24 inch size limit); sablefish 2,000 lb/ month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.</p>				

TABLE 3 (South) cont'

1/ Yellowtail rockfish is included in the trip limits for minor shelf rockfish. POP is included in the trip limits for minor slope rockfish. Bronzespotted rockfish have a species specific trip limit.
 2/ "Other flatfish" are defined at § 660.11 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.
 3/ The size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.
 4/ "Other fish" are defined at § 660.11 and include sharks, skates (including longnose skates), rattfish, morids, grenadiers, and kelp greenling.
 5/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.
 6/ The "modified 200 fm" line is modified to exclude certain petrale sole areas from the RCA.
